

Connected Safety

3M™ Inspection & Asset
Management System

Smart.
Connected.
Personal.

3M Science. Applied to Life.™

Enhance compliance. Save time. Be proactive.

With the 3M™ Inspection & Asset Management System, you're not just streamlining your safety and asset management process — you're giving yourself access to real-time data that can help you enhance worker protection. The advantages of having data at hand versus on file include:

▶ **Added compliance confidence**

Know at a glance the status of your workforce and equipment.

▶ **Data on demand**

Get a direct line of sight on selected compliance metrics in real time.

▶ **Pick your priorities**

Configure your workflow to meet different needs in different parts of your operation.

▶ **Account for your assets**

Improve traceability of high-value assets.

▶ **Sure and secure**

Put your trust in a high-security software platform with powerful encryption and multi-factor user authentication.

▶ **People, not paperwork**

Gain efficiency with everything entered and stored online, allowing you more time on the floor.

It's time for connected safety that's more personal.

3M™ Inspection & Asset Management System is the new way to stay compliant, audit ready and data savvy.

1. Select

Choose the personal protective equipment (PPE) and/or equipment to include in the Inspection & Asset Management System. The system will automatically load up-to-date documentation for most 3M™ PPE, but you can easily add details for non-3M PPE and equipment.

2. Tag

Attach the radio frequency identification (RFID) tags to the PPE and/or equipment you want to enable. Barcodes or serial numbers can also be used.

3. Set up

Enter the maintenance and inspection checklists you currently do on paper.

4. Enter

Load the employee, PPE and/or equipment you want to include into the database.

5. Go

That's it. You're now ready to manage your PPE and equipment program digitally.

If you have any trouble with setup, we'll be happy to help — even onsite. Contact 3M Technical Service at 800-243-4630.

Compatible with i-Safe™ Tags — standard on most 3M™ DBI-SALA® Fall Protection Equipment.

Product SKUs

SKU	Description
Software	
6100001810	3M™ Inspection & Asset Management Software, Bronze Package
6100001811	3M™ Inspection & Asset Management Software, Silver Package
6100001812	3M™ Inspection & Asset Management Software, Gold Package
6100001813	3M™ Inspection & Asset Management Software, Platinum Package
6100001816	3M™ Inspection & Asset Management Software, 250 Managed Asset Block
RFID Tags & Reader	
7100109019	3M™ Adhesive Mount HF RFID Tag for Flat Surfaces, Black, 50 Pack, 1 Ea/Case
7100110753	3M™ Adhesive Mount HF RFID Tag for Curved Surfaces, Black, 50 Pack, 1 Ea/Case
7100107839	3M™ Mechanical Mount HF RFID Tag, Black, 50 Pack, 1 Ea/Case
7100107843	IDBLUE® ultra-mobile HF RFID Bluetooth® Reader, IDBLUE.HF, 1 Ea/case
