**Gentle on teeth.
Tough on cavities.**

3M™ Clinpro™ Tooth Crème

0.21% Sodium Fluoride Anti-Cavity Toothpaste

Patient information

Innovative toothpaste to make every brush better.

Everyone can benefit from extra protection from tooth decay. That's why we created **3M™ Clinpro™ Tooth Crème 0.21% Sodium Fluoride Anti-Cavity Toothpaste** – an advanced formula designed for everyday.

Clinpro Tooth Crème is more than just an over-the-counter toothpaste. Its exclusive anti-cavity ingredient, functionalized Tri-Calcium Phosphate (fTCP), is engineered to give you the protection you need – easily, effectively, and without interrupting your busy schedule.

- Strengthens the entire tooth, not just the surface
- Gently cleans and whitens teeth
- Proven through 10 years of clinical usage
- Contains our innovative anti-cavity ingredient, functionalized Tri-Calcium Phosphate (fTCP)

Available in two great flavors:
Vanilla Mint and Spearmint

fTCP: The secret ingredient to a healthy smile.

Your teeth are made of minerals – calcium and phosphate – which can break down when exposed to cavity-causing, sugary and acidic food and drinks. Thankfully, brushing with fluoride toothpaste gives your teeth the minerals needed to rebuild. But not all toothpastes deliver these minerals efficiently.

Functionalized Tri-Calcium Phosphate (fTCP) is a special ingredient designed to deliver calcium and phosphate – the building blocks of healthy teeth – in the most efficient, effective way possible, so they can work with fluoride to strengthen your smile.

What's on your dental health forecast?

When it comes to dental health, many factors can increase your risk of tooth decay, including:

- High-acid, high-sugar diets
- A history of cavities
- Lost teeth due to cavities
- Orthodontic brackets
- Dry mouth caused by medication or medical conditions

Clinpro Tooth Crème helps give you extra protection without any extra steps.

Don't change your routine, strengthen it.

Clinpro Tooth Crème is safe to be used twice daily in place of your regular over-the-counter toothpaste, or as directed by a dentist.

How to use Clinpro Tooth Crème

Adults and children 2 years and older should place a thin ribbon or pea-sized amount of toothpaste on a soft-bristled toothbrush and brush for at least two minutes.

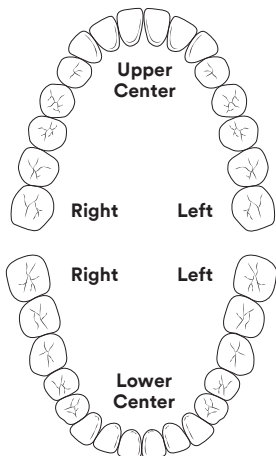

Your examination has revealed the following:

Your specific conditions are shown to the right.

1. Cavities
2. Root Cavities
3. Plaque Build-Up
4. "White Spots"
5. Tooth Sensitivity
6. Gum Disease/Gingivitis
7. Periodontal Disease

General conditions:

- Oral Malodor
- Dry Mouth
- _____
