

**3M** Science.  
Applied to Life.™

3M™ Connected Safety

Smart.  
Connected.  
Personal.

# Enhance compliance. Save time. Be proactive.

With the 3M™ Safety & Inspection Manager, you're not just streamlining your safety and asset management process – you're giving yourself access to real-time data that can help you enhance worker protection.

The advantages of having data at hand versus on file include:

- **Added compliance confidence**

Know at a glance the status of your workforce and equipment.

- **Data on demand**

Get a direct line of sight on selected compliance metrics in real time.

- **Pick your priorities**

Configure your workflow to meet different needs in different parts of your operation.

- **Account for your assets**

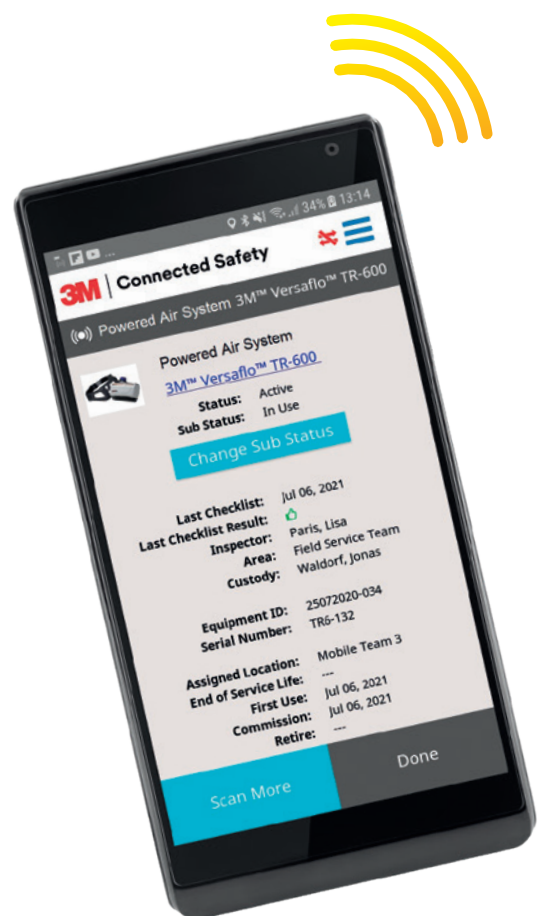

Gain improved traceability of high-value assets.

- **Sure and secure**

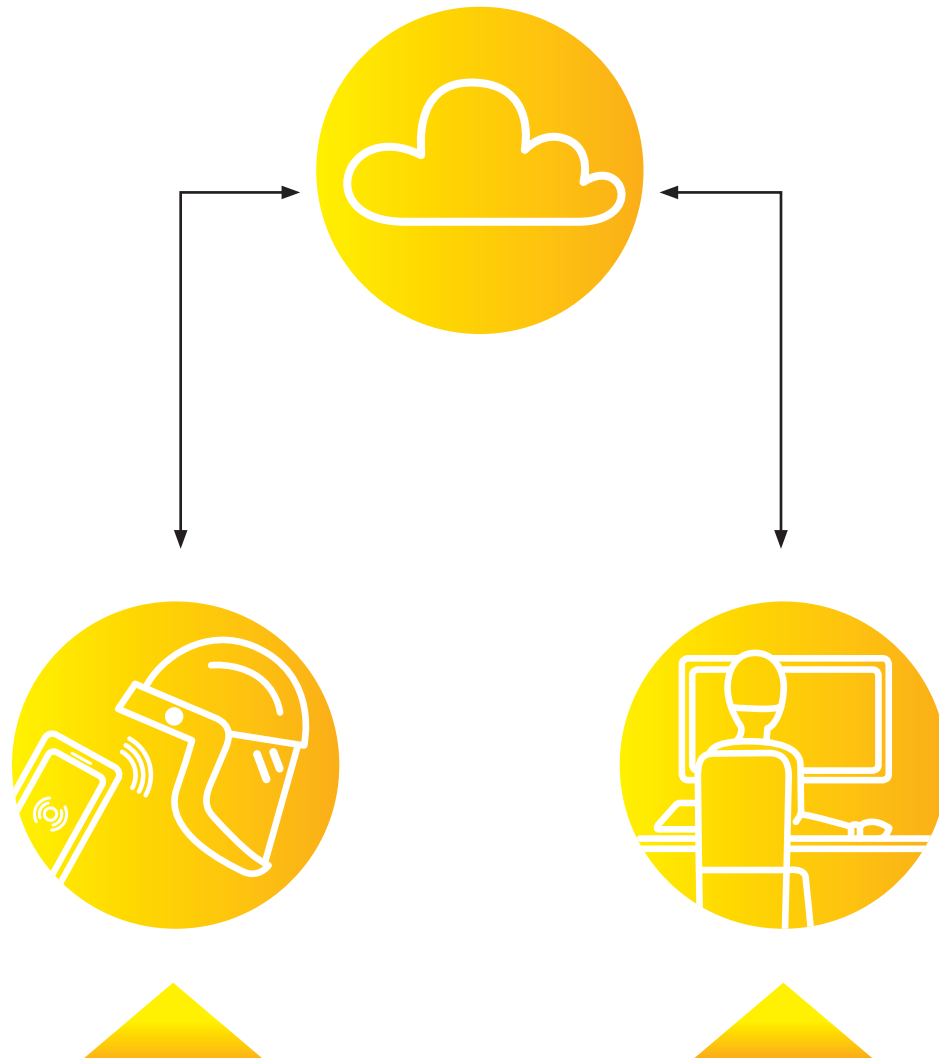

Put your trust in a high-security software platform with powerful encryption, authentication, token-based access control, and other methods.

- **People, not paperwork**

Gain efficiency with everything entered and stored online, allowing you more time on the floor.

# The cloud-based system solution of 3M.

## Mobile app with RFID tags

- 3M™ Connected Safety app
- Quick RFID data acquisition
- Easy barcode data acquisition
- Readable by smart phone
- Assignment of PPE and safety equipment
- Inspections of areas, equipment and employees
- Usage of individual checklists

## PPE Management System

- Management of material and areas
- Creation of new check lists
- Export and print reports
- Access by browser (independently from user system)
- Optimized preparation of inspections and audits

# 3M™ Connected Safety a strong connection.

## Connect to products.

- Quickly access equipment history and upcoming events
- Assign personal protective equipment (PPE)
- Software includes checklists and instructions for popular 3M PPE products (e.g. DBI-SALA® Fall protection)
- Use it with your existing PPE and other equipment, including hoists, forklifts, fire extinguishers etc.

## Connect to people.

- Access to employee training status and information
- Keep your workforce up to date on compliance with real-time access to selected data and email notifications
- Access information on your mobile device or using a web browser on your desktop computer
- Spot issues that can help identify potential health and safety concerns
- Document PPE usage to help lower risk more easily

## Connect to places.

- Cloud-based for simple deployment and access anywhere
- Instantly connect to data across multiple locations and production sites
- Instantly transfer data after collection
- Intuitive dashboard for quick overview and easy use

# It's time for connected safety that's more personal.

**3M™ Connected Safety is the new way to stay compliant, audit-ready and data savvy.**

## 1. Select

Choose the PPE and/or equipment to include in the Safety & Inspection Manager. The system will automatically load up-to-date documentation for most 3M PPE, but you can easily add details for non-3M PPE and equipment.

## 2. Tag

Attach the RFID tags to the PPE and/or equipment you want to enable. Barcodes or serial numbers can also be used.

## 3. Setup

Enter the maintenance and inspection checklists you currently do on paper.

## 4. Enter

Load the employees, PPE and/or equipment you want to include into the database.

## 5. Go

That's it. You're now ready to manage your PPE and equipment program digitally.

## 3M™ Connected Safety

Description	Material number
<b>Software</b>
