**3M™ Glass Finishes**

With over 100+ unique designs, patterns and textures, 3M™ Glass Finishes give you an easy way to add that extra element of design to your space.

At 3M we offer a variety of portfolios to choose from — each developed with a specific design need in mind, including: 3M™ FASARA™ Glass Finishes, 3M™ DI-NOC™ Glass Finishes, 3M™ CRYSTAL Dusted and Frosted Glass Finishes, and 3M™ DICHROIC Glass Finishes.

All glass finish films are ideal for privacy and decorative applications in offices, hotels, retail stores, restaurants, healthcare environments, and designed for ease of application and cleaning.

---

**Apply to nearly any glass surface**

3M™ Glass Finishes can be easily applied to most new or existing glass surfaces. They require no extra hardware or setup — and no added maintenance or special cleaning. Also, as needs change, these decorative films can be quickly applied and removed.
3M™ FASARA™ Glass Finishes

- Made from a durable polyester film with a pressure-sensitive adhesive backing
- Capture the look of custom etched, cut or sandblasted glass
- Choose from a variety of patterns — created in collaboration with leading designers from across the globe
- Tailor the light, privacy and style of your space
- Whiteboard WH-111G can turn any glass surface into a writable, erasable canvas

3M™ FASARA™ Print Direction

Print direction runs down the roll length of the film for most designs that are not Gradation, for Venetian Gradation, and for Illumina Silky-W and -S single panel sheets. Print direction runs across the roll width of the film for most Gradations and Stripe/Border designs.

3M™ FASARA™ Gradation Transmission

For Gradations, percent Transmission is an estimate of Visible Light Transmission for the most transparent and least transparent sections of the pattern. These values are typical but not warranted.

<table>
<thead>
<tr>
<th>100% Transmission</th>
<th>Lower % Transmission</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clear Film (Most Transparent)</td>

</table>
3M™ DI-NOC™ Glass Finishes

- NEW portfolio added to our glass finishes collection
- Provides durable glass surfaces with a dimensional appearance
- Apply under glass surfaces including walls, panels, table tops, shelves, fixtures and more
- Available in opaque designs such as abstract, stone, fabric, woodgrain and metallic

3M™ CRYSTAL Dusted and Frosted Glass Finishes

- Achieve the look of sandblasted or etched glass
- Create custom cut shapes to promote your brand and design
- Provide privacy in interior or exterior spaces while keeping an open feel

3M™ DICHROIC Glass Finishes

- Create dynamic, color-shifting appearance in cool or warm tones influenced by the environment
- Apply film on exterior or interior glass surfaces
- Transparent dichroic color effect changes color when viewed from different angles

Gradation

Cloud White  SH2FGCL

Illumina Silky-W  SH2SSIM-W
Cloud is a center gradation available in full rolls with the print direction across the roll. The gradation becomes transparent at both edges across the roll.

**Cloud**
- Roll width: 1524mm with 240mm print width in center.

**Cloud Narrow**
- Roll width: 1270mm with 100mm print width in center.

Illumina Silky-W and Illumina Silky-S are provided in single panel sheets with the print direction down the sheet length, wound on a small roll.

The printed area for Illumina Silky does not continue all the way to the width of the sheets.

**Illumina Silky-W**
- A center gradation which becomes transparent at both ends of the sheet.
  - Sheet size: 2950mm x 1524mm
  - Printed area: 2400mm x 1450mm

**Illumina Silky-S**
- A single gradation that becomes transparent on one end of the sheet.
  - Sheet size: 1980mm x 1524mm
  - Printed area: 1900mm x 1210mm
