the better it looks.**

3M™ Wireless Equipment Concealment Films make wireless infrastructure blend into the surrounding environment.

# Rooftop Deployment

## 3M™ Conceal Film

3M™ Conceal Film uses light management technology to create a camouflage effect that reduces the visual impact of cellular antennas. Wireless infrastructure mirrors the surrounding natural environment, whether skies are clear, grey or partly cloudy.

- ▶ Metal-free film minimizes signal loss
- ▶ Long-term outdoor durability
- ▶ Eliminates the need for facades like faux trees

# Small Cell Deployment

## 3M™ Envision™ Print Wrap Films LX480mC and SV480mC and 3M™ Anti-Graffiti Wrap Matte Overlamine 8590

3M™ Print Wrap Film and Overlamine is a printable solution that helps blend the wireless infrastructure into the surrounding built environment.

- ▶ Digitally printable and conformable, making it easy to install
- ▶ Resists soil, water, UV and graffiti
- ▶ RF transparent (<0.5 dB insertion loss)

# See the difference.

3M™ Conceal Film works by reflecting an antenna's surroundings into the viewer's line of sight. So instead of seeing an antenna, the viewer sees an image of its surroundings.

3M™ Print Film can be printed to match nearly any background to disguise and camouflage antennas, blending them into the surrounding environment.
