

# The Secret Weapon for Your Restaurant

The case for switching to the Scotch-Brite™ Quick Clean Griddle Cleaner System

## The Situation

For years Chef Alon, executive chef at a Woodbridge, Ontario, golf course, has been struggling to keep his flat top griddles clean. Having worked in the industry for 15 years, he has tried many different products, from harsh chemicals to steel wool, but was never truly satisfied with the level of cleanliness and the amount of time these methods took to use.

## 3M Solutions and Results

After hearing about the Scotch-Brite™ Quick Clean Griddle Cleaning System, Chef Alon decided to give it a try. The three-step process is easy to use. First, pour the Scotch-Brite™ Quick Clean Griddle Liquid 700-40 or 701 onto your hot griddle [150°C-175°C (300°F-350°F)]. The bubbling of this powerful liquid lifts and loosens stubborn burned-on food, soil and grease from the griddle surface. Then, using the Scotch-Brite™ Griddle Polishing Pad 46 and the Scotch-Brite™ Multi-Purpose Pad Holder 405-R, apply light pressure and gently scrub the griddle. Finally, use the Scotch-Brite™ Squeegee to reveal your clean griddle. The Scotch-Brite™ Quick Clean Griddle Cleaning System is Green Seal™ certified\* so Chef Alon's staff no longer has to worry about using harsh chemicals for griddle cleaning. Also, the griddle pad holder is 40 cm long, which helps keep hands safe and away from the hot griddle, reducing the risk of burns. Best of all, the entire process only takes a few minutes!

Since implementing the Scotch-Brite™ Quick Clean Griddle Cleaning System, Chef Alon has reduced griddle cleaning time from 20-30 minutes to just a few quick minutes. According to Chef Alon, "no other hi-temp griddle cleaner on the market [that I have tried] compares to the ease and result of this product. I've been experimenting with different products to deal with my flat top for the past couple years and nothing has been as good as the Scotch-Brite™ Quick Clean Griddle Cleaning System."

\*Scotch-Brite™ Quick Clean Griddle Liquid meets Green Seal™ Standard GS-53 based on effective performance, minimized/recycled packaging, and protective limits on VOCs and human and environmental toxicity. [GreenSeal.org](http://GreenSeal.org).
