3M Medical Securement Solutions

Essential securement for every need.

Raise the standard of patient care by choosing
the right securement solution for your application.

You have a job to do. We have the securement solutions to help you do it right.

We understand the impact securement solutions and clinical practice can have on both patients and your facility. That's why we help simplify your selection by offering each type of securement to meet your needs.

Securement considerations

According to the *Medical Adhesives and Patient Safety: State of the Science* consensus statements, the foremost consideration when selecting an adhesive product is intended use or purpose.¹ In most facilities, we find that securement needs fall into four basic classes.

Informed choices reduce clinical and cost impacts.

Despite its highly frequent use, only 38% of clinicians say they have received proper training on how to use medical tape.² Choosing the right securement, as well as applying and removing it correctly, may help reduce the risk of Medical Adhesive-Related Skin Injury (MARS) and dislodgement, which can lead to better outcomes and cost savings for your facility.

Nearly **3 in 4** clinicians said medical tape plays a critical role in providing high-quality care.²

One study showed up to 25% daily prevalence of MARS over a 28-day period.³

Reduce the risk of cross-contamination with packaged single-patient-use rolls.

Individually packaged rolls can:

- help prevent the products from being exposed to environmental contaminants
- minimize its contact with facility surfaces and equipment
- reduce exposure to healthcare worker hands

100% of tape rolls contaminated

Contamination was evident on 100% of 24 bedside tape rolls at 1, 5 and 7 days during a study conducted in a 16-bed ICU at a 560-bed teaching hospital.⁴

52% of tape rolls contained MRSA and VRE

In one observation, 11 out of 21 tape samples used for multiple patients contained methicillin-resistant *Staphylococcus aureus* (MRSA) and/or vancomycin-resistant enterococci (VRE).⁵

3M Medical Securement Selection Guide

Which 3M medical securement solutions should I choose?

Clinical Applications Such As:

Securement Class

- Blood draws
- Dressings
- Immobilization
- Securement for difficult to dress areas (head, fingers, toes)
- Support and mild compression for soft tissue injuries (i.e. strains, sprains)*

Non-adhesive

3M™ Coban™ NL Non-Latex Self-Adherent Wrap

- Blood draws
- Light-weight dressings
- IV lines and tubing (secondary securement)
- Non-critical tubes

Multi-purpose

3M™ Micropore™ S Surgical Tape

- Dressings and added pressure
- IV lines and tubing (secondary securement)
- When swelling or movement is anticipated
- Central venous catheters (secondary securement)
- Chest tubes
- Surgical drain tubes

Flexible

3M™ Medipore™ H Soft Cloth Surgical Tape

- Urinary catheters
- Nasogastric tubes
- Orogastric tubes
- Patient positioning

High-strength

3M™ Durapore™ Surgical Tape

Consider a barrier like 3M™ Cavilon™ No Sting Barrier Film with 3M™ Durapore™ Surgical Tape (per facility protocol)

Skin performance: The feather designates products that deliver the securement power you need while minimizing damage to skin.

*May use as a component in a compression wrap system support only under supervision of a wound care specialist.

A choice that's critical to care.

At 3M, we've made it easy to choose the right securement for each patient and application, with four classes of securement that can work harder and smarter. Learn more at [3M.com/MedicalSecurement](https://www.3M.com/MedicalSecurement).

Individually packaged single-patient-use rolls can help protect patients by reducing the risk of cross-contamination.**

Non-adhesive

3M™ Coban™ NL Non-Latex Self-Adherent Wrap

- Suitable for all patients, including those with fragile and at-risk skin
- Sticks to itself without the need for adhesive, pins or clips, allowing for fast and easy application
- Hand tearable—eliminates the need for scissors
- The product is not made with natural rubber latex

Ordering information

2082-1X	2 in. x 60 in. (5 cm x 1,5 m)*
2083-1X	3 in. x 60 in. (7,5 cm x 1,5 m)*
2084-1X	4 in. x 60 in. (10 cm x 1,5 m)*
2086-1X	6 in. x 60 in. (15 cm x 0,6 m)*

Other non-adhesive 3M medical securement solutions:

3M™ Coban™ Self-Adherent Wrap (contains latex)

*Stretched length

Multi-purpose

3M™ Micropore™ S Surgical Tape

- A gentle tape suitable for use on all patients, including elderly and pediatric patients
- Reliable adhesion that stays in place for up to 48 hours¹
- Removes cleanly with minimal disruption of skin layers or causing patients undue discomfort
- Easy, bi-directional tear

Ordering information

2770S-1	1 in. x 1.5 yd. (2,5 cm x 1,3 m)
2770S-2	2 in. x 1.5 yd. (5 cm x 1,3 m)

Other multi-purpose 3M medical securement solutions:

3M™ Transpore™ White Surgical Tape
3M™ Micropore™ Surgical Tape
3M™ Transpore™ Surgical Tape

Flexible

3M™ Medipore™ H Soft Cloth Surgical Tape

- Soft cloth material to maintain skin integrity
- Multi-directional stretch helps minimize the risk for skin injury
- Flexibility accommodates for swelling, distention, and movement
- Breathable tape for a broad range of applications
- Perforated and easy to tear

Ordering information

2860S-1	1 in. x 2 yd. (2,5 cm x 1,8 m)
2860S-2	2 in. x 2 yd. (5 cm x 1,8 m)
2860S-4	4 in. x 2 yd. (10,1 cm x 1,8 m)
2860S-6	6 in. x 2 yd. (15,2 cm x 1,8 m)

Other flexible 3M medical securement solutions:

3M™ Microfoam™ Surgical Tape

High-strength

3M™ Durapore™ Surgical Tape

- Silk-like cloth tape that provides secure adhesion
- Strong material that's also ideal for immobilization applications
- Easy, bi-directional tear

Ordering information

1538S-1	1 in. x 1.5 yd. (2,5 cm x 1,3 m)
1538S-2	2 in. x 1.5 yd. (5 cm x 1,3 m)

Other high-strength 3M medical securement solutions:

3M™ Multipore™ Dry Surgical Tape
