Now our most popular flowable is easier to inject.

3M™ Filtek™ Supreme Flowable Restorative is available in a new ergonomic syringe. Designed for improved comfort and easier injection, this new product is called 3M™ Filtek™ Supreme Flowable Restorative.

Reduce bubbles and waste
Virtually no bubbles or material “run-on” during dispensing gives you better control.

No more guessing
The blue syringe barrel indicates the remaining material volume. When your syringe is empty, only the white plunger shows.

Bendable cannula
Easy-to-bend without kinking for better access.

Easy to hold and inject
Triangle finger plate and plunger make it quick and easy to personalize your grip.
Key benefits
- Virtually no bubbles or material “run-on”
- Easy-to-bend cannula for improved access
- Ergonomic design is easy to hold and inject
- Excellent adaptation, polish retention and wear resistance
- Versatile for a wide range of indications and techniques

Can be warmed for injection molding
Warm up to 70°C (158°F) for up to one hour, up to 25 times.

Clinical cases
3M™ Filtek™ Supreme Flowable Restorative offers a smooth transition from material to tooth for esthetic restorations.
