

A visual guide to

3M™ 360 Encompass™ Audit Expert System – Code Audit

By adding 3M 360 Encompass Audit Expert Code Audit to the 3M™ 360 Encompass™ System platform, organizations can integrate batch-driven auditing capabilities into their auditing process.

The result? Streamlined workflows on one system, reduced manual steps and increased team communication and coordination.

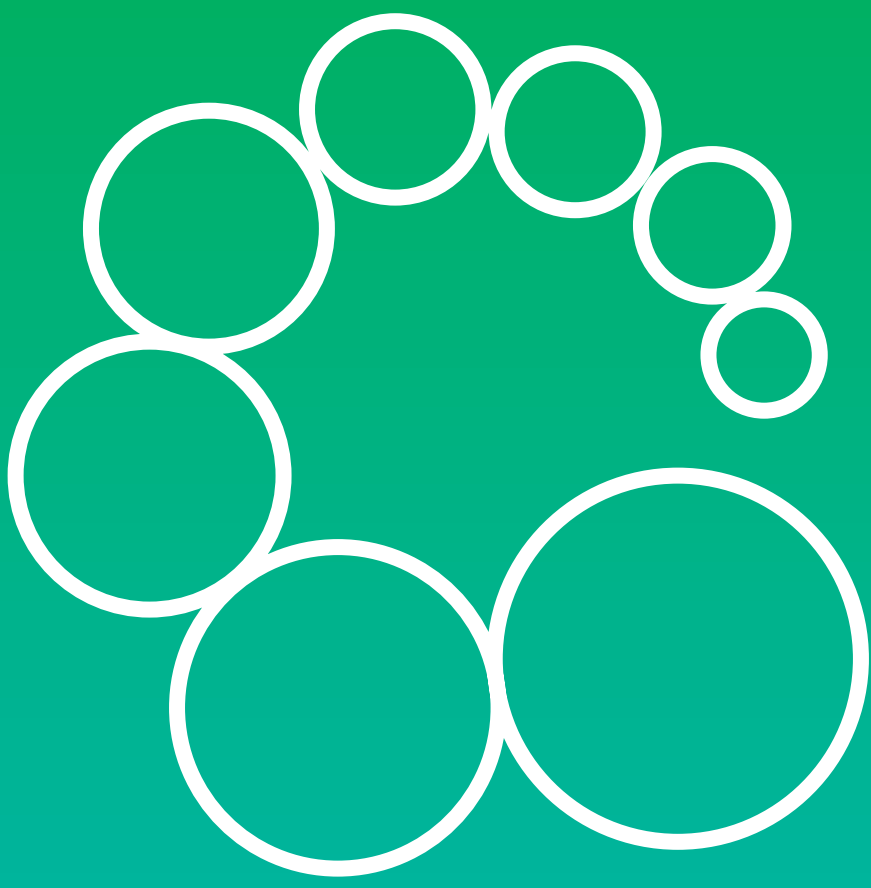

Sustainable efficiency

Increase auditing efficiency through batch creation, auditor analysis and coder communication by leveraging a single platform.

Intuitive insights

Visual dashboards help managers see in real-time the key information they need to track, including productivity, record status and financial impact estimates.

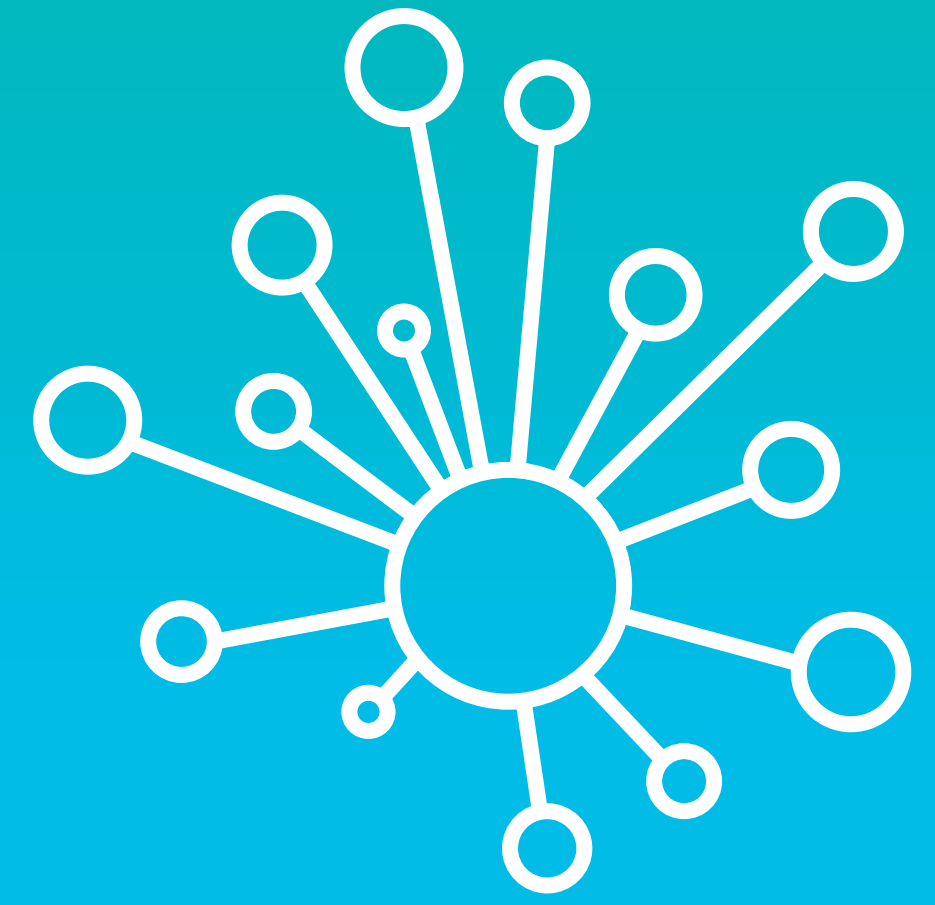

Intuitive workflow

Code Audit delivers a user-friendly workflow for management to develop cadenced and concise batch-driven audits based on the organization's needs.

3M's single platform advantage

Built upon the 3M™ 360 Encompass™ System platform, Code Audit validates the integrity of inpatient codes using the same system on which inpatient coding is performed.
