For chromic acid anodization,

Liquid masking has met their match.

Introducing 3M™ Anodization Masking Tape 8985L

• Can reduce labor time and associated costs up to 60%).
• Reduces the number of masking steps.
• No messy chemicals or unpleasant odors.
• Eliminates curing time of liquid masking.
• Reduces the need for solvents during removal.

Try it today: 3M.com/ExtremeMasking

3M Extreme Masking Solutions
Reliability • Performance • Productivity

\(^{1}\)Up to 5x faster to apply and remove than liquid masking. 3M internal data. \(^{2}\)3M internal data.
3M™ Anodization Masking Tape 8985L outperforms other anodizing masking solutions.

Are you ready to save up to 60%¹ on labor time and associated costs with your chromic acid (Type 1) anodization process? 3M™ Anodization Masking Tape 8985L features excellent masking lines, clean one-piece removal and no curing time. Eliminate the pain of messy chemicals and unpleasant odors in your process with a masking tape that can take on extreme conditions and harsh environments.

- Designed to work with or without chemical film on a variety of aluminum alloys.
- Transparent, colored tape with printed backing is highly visible for fast positioning and removal.
- Linered for easy die cutting.

³M internal data. ¹Up to 5x faster to apply and remove than liquid masking. ²M internal data.

Reliability
Get consistency and peace of mind with a non-silicone tape that won’t introduce contamination in the production process.

Performance
Replace messy, labor-intensive liquids with a reliable tape solution that’s built specifically for chemical resistance to chromic acid.

Productivity
Mask and de-mask up to 5x faster than liquids. Eliminate rework, extreme leakage or scrapped parts with excellent masking lines and clean, easy removal.
