Individuals looking to purchase 3M disposable filtering facepiece particulate N95 respirators for use outside of a work setting should check first with their local:

- Home Improvement stores; and
 - For additional information, please visit: www.3m.com/safetyproducts
- Pharmacies
 - For additional information, please visit: [Respiratory Wellness](#)

3M also sells respirators, including disposable filtering facepiece particulate N95 respirators, for use at work through a wide range of safety and industrial distributors. To find safety and industrial distributors with product available for purchase in your area, please visit 3M.com/disposable-respirators and access our “Where to Buy” feature.

Use of Disposable Filtering Facepiece Particulate Respirators

Individuals using respiratory protection should always carefully read and follow the User Instructions for the model of respirator they are using. It is very important that users of disposable filtering facepiece respirators be clean-shaven and follow the donning instructions exactly to get a good seal between the respirator and the face. If you do not have a proper fit to the face, you will not get the expected protection from the respirator. Users with underlying heart or lung conditions should consult a physician prior to use.

Remember that it is time to dispose of your disposable respirator and obtain a new one when it becomes dirty, damaged or difficult to breathe through.

If you have any questions, the 3M Personal Safety Division’s Technical Helpline, 1-800-243-4630, can answer questions about respirators and their use. Remember that it is time to dispose of your disposable respirator and obtain a new one when it becomes dirty, damaged or difficult to breathe through.
