

A person is using a 3M Easy Trap Sweep & Dust Sheet on a wooden floor. The tool has a long green handle and a black head with a metal claw. The head is positioned over a rectangular black sheet that is being pulled across the floor. In the background, there is a modern grey desk and a purple chair. The text "3M™ Easy Trap™ Sweep & Dust Sheets" is overlaid in white, bold font, and "Pick-up Power That Can't Be Beat*" is overlaid in white, italicized font.

3M™ Easy Trap™ Sweep & Dust Sheets

*Pick-up Power That Can't Be Beat**

*As tested under normal use conditions.

Problems with Current Dusting Products

- Staff may not apply spray treatment correctly
- Sprays have chance of leaving greasy or tacky feeling
- Some dust mop can create a higher drag in humid conditions
- Tools are often difficult to clean
- Finer particles (glitter & hair) often hard to get up
- Feels like your just pushing dirt from Point A to Point B instead of removing it

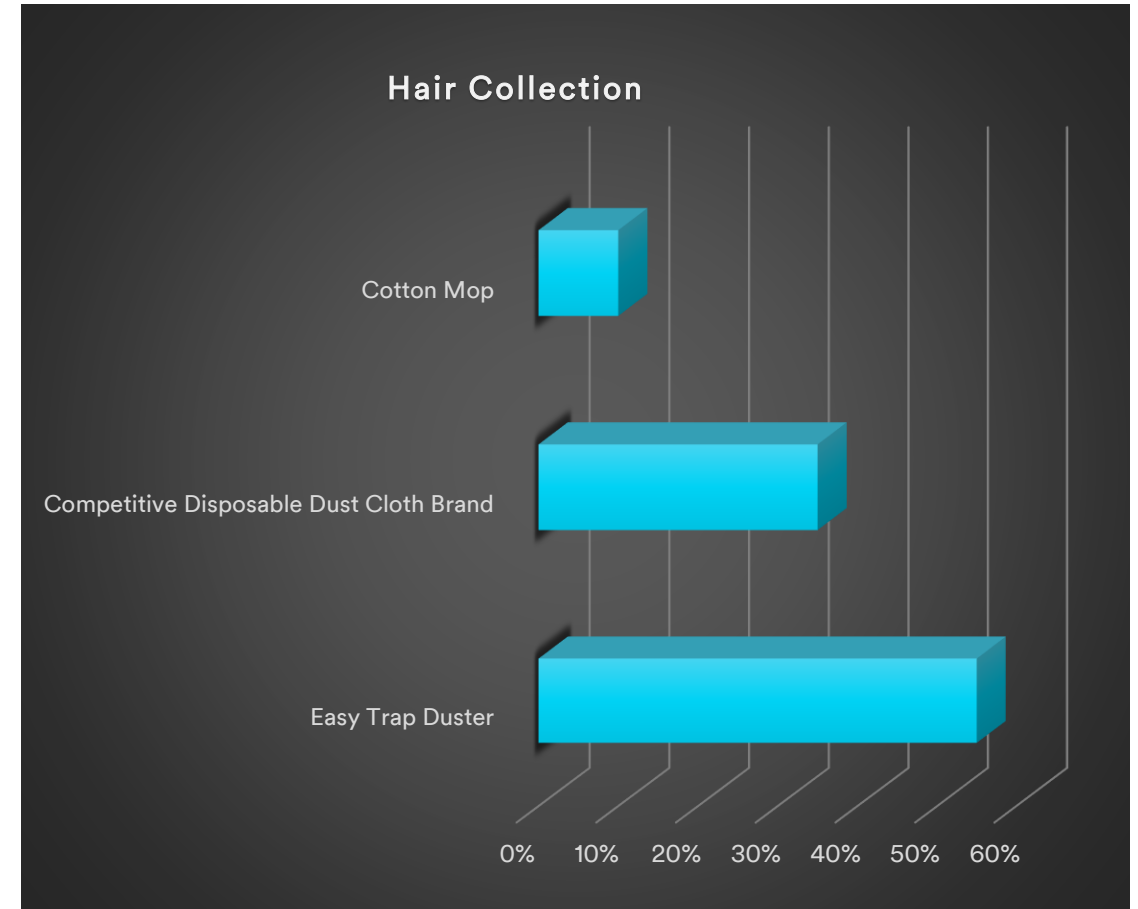

Pick Up Power That Can't Be Beat - *Dirt, Dust & Sand*

- Up to 800% greater pick up of dirt, dust & sand than reusable dust mops and a competitive sweeping dust cloth brand

Pick Up Power That Can't Be Beat - *Hair*

- Testing shows better pick up of hair than a popular competitive sweeping dust cloth and flat fringed cotton dust mops
- Unsightly hair clings to fibers – not you, not your patients, not your customers
- A must have for salons, vet clinics, hotel rooms

20MM People in US Allergic to Dust Mites*

- Better pick up means better control of allergens – dust mites, plant pollen, hair, skin, etc.
- Easy Trap sheets help reduce allergens, which may be present in dust**
- Adhesive traps dust mites
- Disposability assures removal
- *Dust mites are microscopic eight-legged bugs related to ticks and spiders that live in dust*

*<https://www.healthline.com/health/allergies/dust-mites/> Asthma and Allergy Foundation of America

**Based on published studies observing allergens in settled dust at commercial facilities

The Difference is Clear

Don't Be Fooled by Imitators

- 35% lower drag/effort required for floor use than other tacky dust sheets
- Less residue left on surfaces

Performance

- 3M tests under normal use conditions unlike some brands that test using methods atypical to practice
- Proprietary engineering process designed so fibers & adhesives work together to pick up and hold
- 3M brand adhesive chosen to minimize drag and maximize pick up

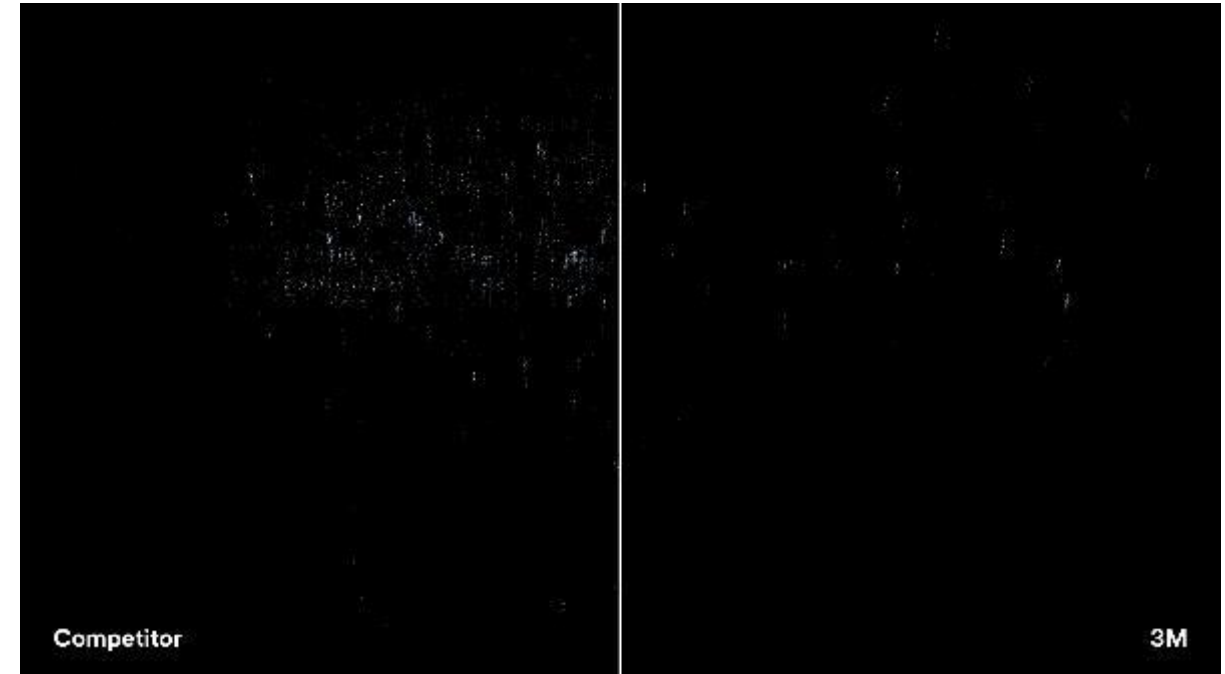

Not Stiff

- Gets into grooves & crevices
- Wraps around high dusters easily

Picks Up in Water

- Doesn't simply pass through water

Less Residue

It's Not About Strength, It's What You're Made Of

Non-Woven Fibers

- 3M proprietary construction also used in 3M™ Floor Pads and Filtrete® Furnace Filters
- Designed with pockets to help hold debris
- Pliable enough to wrap around and stay on high dusters yet durable enough for the veracity of the floor
- Made with at least 60% recycled content

Adhesive

- Designed to work with fibers to pick up and hold debris
- 3M scientists developed adhesive
- Carefully selected to hold debris without compromising drag on floors, conceptually similar to Post-it® Brand Notes
- Picks and holds debris leaving less residue than a competitive tacky disposable dusting sheet

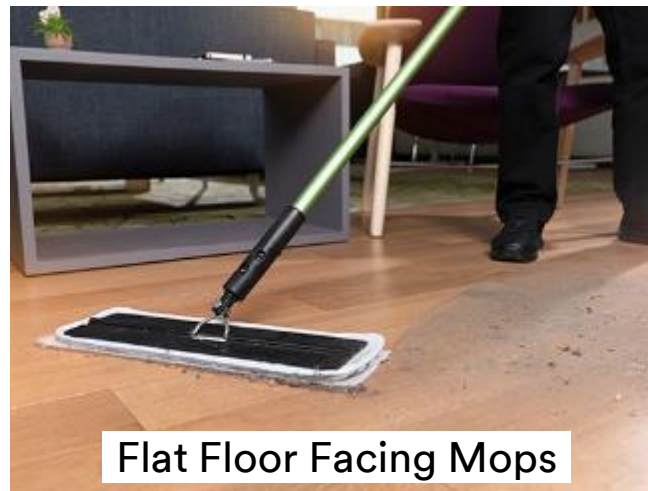

Manufacturing

- 3M patented manufacturing technology
- Perforations designed to tear easily

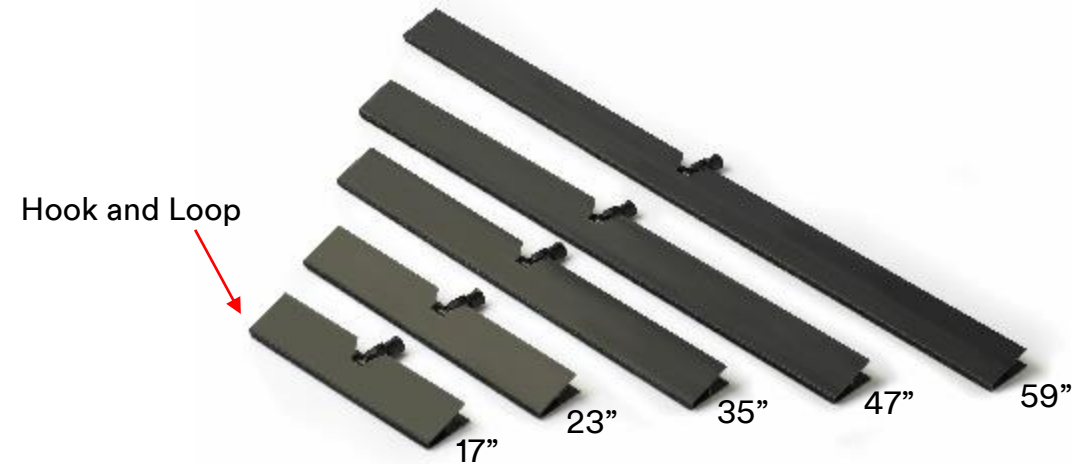

Use What You Already Own

- No unique tool necessary
- Light adhesive acts as a sticking agent to connect sheets to tools
- Wrap around nearly any high dusting tool
- Use under any flat floor facing tool

Use Both Sides Without Touching

- One less touch and faster cleaning available with 3M™ Easy Trap™ Flip Holders
- Once sheet is saturated, simply flip of the wrist to use the second side
- Sheet remains on holder with 3M™ Hook and Loop. Replacement hook and loop available.
 - 23" designed with clamp system to secure sheets
- Attaches to any standard threaded mop or broom handle
- Handle is not included

Using on a Floor Couldn't Be Easier.

1. Determine length of floor tool
2. Pull the number of sheets off the roll required to cover the bottom of the tool – increments of 6”
3. Lay sheet flat on floor
4. Place tool on top of sheet making sure to leave ½ over the front of the tool & on sides and back if available
5. Sheet is full when visually fully saturated or when floor is observed as no longer getting clean
6. Flip sheet over. Use other size.

with Easy Trap

Using On Ceilings Fans is a Breeze.

- Use on nearly any high dusting tool
- Wrap layers of sheets on the tool. Remove sheets as they become saturated
- Wrap sheets starting at the lower end of the head and move up the tool making sure to cover the head thoroughly.
- Do not disconnect sheets.
- Overwrap the first layer of sheets with a second layer until you have the number of layers to make dusting easier
- Repeat wrapping sheets moving from the top to the bottom of the head
- Pinch at the top to cover head of tool fully

How to Use When Hand Dusting

- Tear desired number of sheets
- Slide across surfaces
- Flip over and use second side once fully saturated
- Discard

How to Choose What Size is Right For Your Floor

8" x 6" Sheets
8 rolls – 60 sheet ct.
1 rolls – 250 sheet ct.

8" fits under dust
mops

5" x 6" Sheets
8 rolls – 60 sheet ct.
2 rolls – 500 sheet ct.

5" ideal under:

- Microfiber pads
- 3M™ Easy Trap™ Flip Heads
- Swiffer® Sweepers

Small 60 sheet ct. fits easily on cleaning carts and small closets
Large rolls for larger areas when consumption is expected to be high
Perforated dispensing system included on boxes

Apply Floor Finish Without Fear Of An “Uh Oh” Moment.

- Use before applying floor finish to pick up hard to see debris to assure floors are getting a white-glove clean
- Use before applying Scotchgard™ Floor Protection Film
 - *Scotchgard Floor Protection Film is a very thin layer of polyester designed to protect the floor from abusive environments. Common uses include under hand sanitizers in hospitals, under chairs, behind the walls of public garbage cans.*

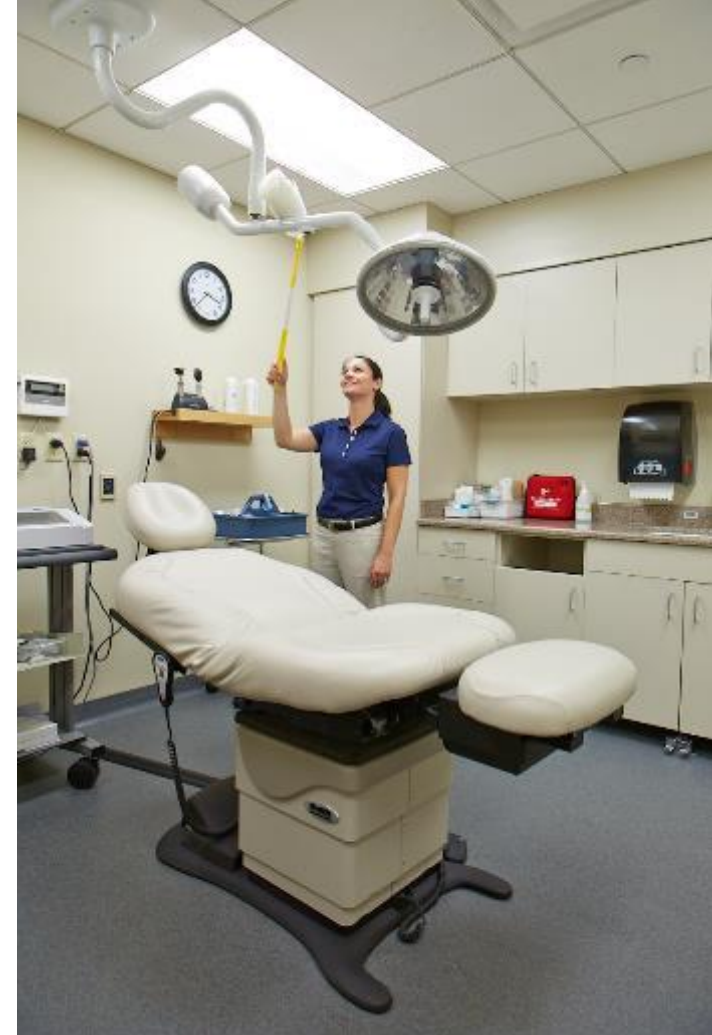

Health Care. A Cure for Unclean.

- Help reduce allergens, which may be present in dust*
- Extremely quiet when in use for in-patient rooms
- Avoids dust showers on patients
- Access difficult to access places - behind toilets, under cabinets, between bed components
- Use as a quick sweep before disinfection
- Dispose of sheets, no laundering required
- Glitter getter in art therapy areas
- Excellent to use for housekeeping “quality assurance”

*Based on published studies observing allergens in settled dust at commercial facilities

BSC about Easy Trap

Education. Get a Degree in Clean.

- Collects dust & sand which helps keep the floor cleaner
- Use before applying floor finish to avoid an “uh – oh” moment
- After pep rally's/school spirit events to get pesky glitter
- Above vending machines, ceiling fans & lockers
- Great at getting glitter in art rooms

Hospitality. Sleep Better Knowing Your Facility is Clean.

- Remove hair from linens to avoid the potential of comping a guest's room
- Collect & dispose of fine beach sand
- Get rid of unsightly bathroom hair
- Use as a 'quality assurance' step to validate cleanliness

Hair Salons & Vet Clinics. You Have Nothing to Lose, But Hair.

- Switch from your current disposable dust cloths
- Adhesive means a better “hold” of hair, dust and debris
- Use at the end of each evening to help start next day fresh and clean
- Better brand image
