

Feel confident your floors are disinfected.

Studies have shown that pathogens from the floor can easily be transferred when items that come in contact with the floor are moved to high-touch surfaces.* **

3M offers a variety of floor disinfection solutions that can help keep patients and staff safe.

*Desphande Study (2017) **Donskey Study (2016)

A simple 3 step process.

1. Fill

Fill your 3M™ Scotch-Brite™ Professional 2-In-1 Flat Mop with appropriately diluted 3M™ MBS Disinfectant Cleaner, 3M™ Neutral Quat Disinfectant Cleaner or 3M™ C. diff Solution Tablets.

2. Apply

Apply chemical disinfectant to the floor using the trigger on your 3M™ Scotch-Brite™ Professional 2-In-1 Flat Mop.

3. Mop

Use approved mopping techniques, applying the disinfectant to the floor in the same way that a neutral cleaner is used for daily cleaning.*

*When disinfecting always ensure that floor remains wet with the disinfectant for the specific contact time.
