Facts and Figures 2019

Technology for our lives

Did you know that you come across 3M technologies and products more than 100 times a day? Some of them you certainly know whereas others are often invisible elements of modern life. You can find our technologies in more than 55,000 products in numerous areas:

- Health Care
- Manufacturing
- Safety
- Automotive
- Electronics
- Network & Infrastructure
- Commercial Solutions
- Transportation
- Design & Construction
- Mining, Oil & Gas
- Consumer

An overview of all products can be found at:

Sustainability at 3M

At 3M, we have been setting ourselves global environmental goals since 1990. We have a clear commitment and an ambitious, long-term strategy for our business. And we strongly believe, there is a solution for every problem and that science can make a difference. Every day, our employees work hard to make our products and processes more sustainable. This is how we are helping to protect the environment and combat climate change:

- Since 2019, every new product entering the development process is required to uphold a Sustainability Value Commitment.
- 3M is flipping the switch to becoming powered 100 percent by renewable energy until 2050. As part of this goal, 3M has joined the global climate initiative RE100.
- Technologies of 3M have helped our customers to prevent more than 40 million tons of CO₂ equivalents since 2015.

Innovation shapes our culture

Our corporate culture encourages us to think differently – and to act differently. The key elements of our philosophy are innovation and creative freedom. With motivation and vision, we are always looking for new ways to support our customers and help them expand their businesses.

- 3M researchers and developers are free to spend up to 15 percent of their time pursuing projects of their own choice. In this way, 3M empowers them to enthusiastically seek solutions for our customers.
- We promote a culture of thinking. Everyone is encouraged to challenge the status quo and pursue research.
- We invest about 1.9 Billion US \$ of our worldwide sales back into research and development.
