

3M™ Advanced CDI Solutions

**Leading the way in clinical
documentation improvement**

*3M Health Information Systems is transforming
CDI with best-practice programs, consultancy and
ground-breaking tools to help capture, track and
report clinical data.*

*We have spent the last few years working with
more than 45 facilities to enhance our CDI offering.*

*We now combine our expertise in CDI with
M*Modal's artificial intelligence (AI)-powered
workflow and documentation creation platforms to
bring you the 3M™ Advanced CDI Solutions program.*

*The outcome is more accurate, complete and
compliant records that result in improved patient care
and appropriate reimbursement for your hospital.*

3M™ Clinical Documentation Improvement Discovery Phase

It can be difficult to know where to start when implementing a CDI program. In the Discovery Phase, the 3M CDI team works with your hospital to conduct a review of a random sample of coded records. This provides a data-driven analysis that highlights areas where improved documentation could result in a more accurate case mix index. The outcomes of the review form the basis of a roadmap for a robust, effective and measurable CDI program.

3M™ Clinical Document Creation Improvement Training for Clinicians

When clinicians are fully engaged in a CDI program, the odds of the program's success increase dramatically. The 3M CDI team can provide workshops for clinicians to build this engagement and drive sustainable improvements in clinical documentation.

3M™ M*Modal CDI Engage™

CDI Engage™ is a revolutionary solution utilising Computer-Assisted Physician Documentation (CAPD) technology to combine document creation, CDI and ICD-10-AM education into a cohesive, clinician-friendly workflow for continuous improvement in clinical documentation and patient care.

CDI Engage™ is built on M*Modal's cloud-based platform that uses proprietary AI and Natural Language Understanding technologies to embed clinical intelligence and automation into existing systems and provide automated feedback as clinicians dictate, type or use templates across multiple care settings.

3M™ Clinical Documentation Improvement Training for Clinical Documentation Specialists

Clinical documentation specialists (CDSs) can add significant value to your hospital's CDI program by being the conduit between clinicians and the clinical coding team. 3M's specialist team provides training for CDSs so they are immediately competent and effective in the hospital environment and can drive your CDI program at a rapid rate.

HIMAA Points Approved Program Professional Credentialing Scheme

The 3M™ DRG Assurance™ Training Program for CDSs is a HIMAA Points Approved Program. To achieve this status the HIMAA committee reviewed the program and determined it met the requirements of its Professional Credentialing Scheme for Senior Associate Membership level. Participants in the 5-day face-to-face program qualify for 70 Continuing Professional Development (CPD) points or Quality Improvement (QI) activity points. For more information about the program, visit the 3M website.

3M™ M*Modal CDI Collaborate™

CDI Collaborate™ is an advanced workflow management solution for CDI specialists. Using AI technology, CDI Collaborate™ automates the query process, standardises CDI practices and leverages in-depth clinical insights to improve patient care and documentation quality. Extend your CDI coverage to 100% of your medical records and all care settings by leveraging our proprietary Natural Language Understanding technology.

#1 CDI Software

The confidence of world-leading experience

- 60+ million clinical documents pass through 3M systems every month
- 250,000+ clinicians use M*Modal speech technology
- 4,000+ hospitals rely on AI-powered solutions from 3M and M*Modal
- 200+ EMRs certified for 3M and M*Modal conversational AI and CAPD
