

3M Science.
Applied to Life.™

Help protect patients from cross-contamination.

3M offers a broad portfolio of high-quality products that help reduce the risk of cross-contamination.

Sterilization and Monitoring

Cleaning Process Monitoring

- 3M™ Clean-Trace™ ATP Monitoring System cleaning monitoring technology quantifies cleanliness assessment results and manages data and trends.

Low Temperature Sterilization

- 3M™ Steri-Vac™ Ethylene Oxide Sterilizers/Aerators deliver a short cycle time and offer compatibility with many medical devices.

Sterilization Monitoring

- 3M offers sterilization monitoring technologies for the most commonly used sterilization modalities.

Hand Hygiene and Single-Use Products

Hand Hygiene

- 3M™ Avagard™ instant hand antiseptics help reduce bacteria on the skin that potentially can cause infection.

Individually Packaged Single Use Rolls of Medical Tapes & Wraps

- 3M's individually packaged single-patient-use rolls can help reduce cross-contamination risk, beyond using unpackaged single patient use length rolls, by helping prevent tape from being exposed to environmental contaminants, minimizing contact with hospital surfaces and equipment, and minimizing exposure to healthcare worker hands.

Single Patient Stethoscopes & Disposable Leadwires

- 3M™ Single-Patient Stethoscope aids clinicians through reliable and clear acoustics while helping to minimize the risk of cross-contamination introduced by reusable stethoscopes.
- Using disposable leadwires may eliminate a potential source of cross-contamination introduced by reusable leadwires.

Respiratory & Skin Protection

Particulate Respirators and Surgical Masks, N95

- 3M™ Health Care Particulate Respirators and Surgical Masks, N95 are scientifically designed to help make breathing easier and safety more comfortable. Our unique manufacturing process injects a powerful electrostatic charge into an open formation material, improving the efficiency of particle removal while allowing more air to pass through.¹

Skin & Nasal

- 3M™ Skin and Nasal Antiseptic is a simple, one-time application that reduces nasal bacteria, including *S. aureus* by 99.5% in just one hour and maintains this reduction for at least 12 hours.²
