

Individually packaged for your peace of mind.

Your orthodontist isn't just focused on giving you the best smile possible, they're doing it with your health in mind. That's because you're at a practice that uses individually packaged 3M products designed to make your bonding appointment faster, limiting your time at the orthodontist.

Spend less time in the chair.

Traditional methods for gluing braces to teeth fail more than twice as often as 3M™ APC™ Flash-Free Adhesive technology, which means you enjoy a reduced risk of emergency appointments.*

Get a smile that's made for you.

Your brackets and adhesive materials are packaged just for you, protected from cross-contamination until your appointment.

Keep it clean.

Your brackets come with a special adhesive that forms a protective coating with no gaps that can accumulate bacteria.
