

3M™ M*Modal Fluency Direct compatibility with GE Healthcare Systems

- Ranked #1 Best in KLAS for Speech Recognition, Front-End EMR for four consecutive years, including 2020
- Create higher-quality documentation directly in the EHR using real-time speech recognition, mobile documentation and/or transcription workflow
- Cloud-based solution enables clinicians to capture the complete patient narrative from any location, using any device and any workflow

The 3M advantage

With M*Modal now part of 3M, we are combining our strengths to close the loop between clinical care and revenue integrity.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Faster, more comprehensive clinical notes

3M speech and artificial intelligence (AI)-powered solutions are engineered specifically to support the GE Centricity™ electronic health record (EHR) system. The 3M and GE partnership is focused on optimizing the user experience of our joint clients to improve physician adoption and satisfaction, as well as the overall quality of clinical documentation.

By speech enabling GE Centricity, 3M solutions drive faster creation of comprehensive clinical notes directly in the EHR. 3M leverages proprietary speech understanding, which is far more than just speech-to-text technology as it includes natural language understanding (NLU) for contextual understanding of the physician narrative.

Certified and easy-to-use solutions

GE Centricity is fully supported by 3M solutions and services, which have been collaboratively certified for use in the GE environment. Using a single, cloud-hosted user speech profile, 3M solutions seamlessly allow physicians of any medical specialty to capture the complete narrative using any workflow and any device from any location. These solutions include:

- **Front-end speech recognition:** 3M™ M*Modal Fluency Direct is consistently top ranked for its superior performance and reliability in capturing the physician's spoken word directly in EHR fields. With 3M Fluency Direct, GE Centricity users can conversationally create, review, edit and sign clinical notes directly in EHR templates. All medical specialty and subspecialty vocabularies are supported, as are the use of customized templates, macros and a library of voice commands.
- **Mobile documentation:** With 3M™ M*Modal Fluency Mobile, clinicians can capture the patient narrative from any device and any care setting: the clinic, the office or an exam room. After the physician selects a patient from the mobile device, the completed narrative automatically populates in GE Centricity.
- **Transcription services:** 3M is a trusted and reliable partner to healthcare organizations for transcription services, continuously delivering unmatched quality assurance, turnaround time and overall cost effectiveness.
