

3M™ M*Modal Fluency Direct compatibility with eClinicalWorks EHR

- Creates time to care by enabling physicians of any medical specialty to dictate higher quality clinical notes directly in the EHR
- A single, cloud-based user speech profile allows physicians to dictate from multiple locations as they move between exam rooms, office and home
- Enables a better user experience and higher adoption of speech-driven workflows

The 3M advantage

The combination of 3M and M*Modal allows us to use our strengths to close the loop between care and revenue integrity.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Call today

Complete, compliant and real time documentation

3M™ M*Modal Fluency Direct has been engineered to speech enable eClinicalWorks so that physicians of any medical specialty can dictate, review and edit clinical notes directly in the electronic health record (EHR). A single, cloud-hosted speech profile can be used from any eClinicalWorks-enabled workstation for rapid adoption, greater productivity and improved physician satisfaction.

3M Fluency Direct enables clinicians to create complete, compliant and real time documentation directly in eClinicalWorks and mobile applications. Physicians can also:

- Use speech understanding to quickly, efficiently and accurately document directly in the eClinicalWorks EHR's free text fields and progress notes
- Document from anywhere using the 3M M*Modal integration with the eClinicalMobile® app on Apple iOS 9+ and Android, as well as the eClinicalTouch® app on Apple iPad iOS 9+*
- Speed up documentation availability with real time dictation that creates instant, high quality medical reports in the EHR
- Efficiently dictate from multiple locations as clinicians move between exam rooms, office and home without the need to sign off from individual workstations
- Define voice-enabled commands to automate frequent tasks and normal text
- Improve the adoption of front-end speech recognition technology while minimizing user-specific activity to train the 3M system
