

3M™ M*Modal Fluency Direct compatibility with NextGen EHR

- Combine documentation creation and CDI into one workflow with CAPD
- Speech enable NextGen ambulatory EHR system so clinicians of any medical specialty can create better, faster and more complete documentation
- Cloud-based user speech profile enables documentation from any location, using any device

The 3M advantage

The combination of 3M and M*Modal allows us to use our strengths to close the loop between care and revenue integrity.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Higher performance, optimized user experience

Cloud-based 3M™ M*Modal Fluency Direct has been engineered to speech enable NextGen ambulatory electronic health record (EHR) with medical narrative dictation capabilities. A single, cloud-hosted speech profile can be used from any NextGen-enabled workstation for rapid adoption and improved productivity.

3M Fluency Direct enables clinicians to create complete, compliant and timely documentation by dictating directly into the NextGen EHR. Physicians can also:

- Use advanced speech understanding technology to efficiently and accurately document directly into NextGen free text fields and templates
- Speed up documentation availability with real time dictation that creates instant medical reports
- Effectively navigate around the EHR using speech commands
- Quickly move between exam rooms, office and home without the need to sign off from individual workstations
- Utilize fully-supported deployments in virtualized environments with applications such as Citrix® XenApp, Citrix XenDesktop, Microsoft RemoteDesktop, Microsoft® RemoteApp and VMware® View
- Maximize investment in EHR deployment by providing rich, narrative clinical notes and improving documentation efficiency within the NextGen EHR
- Customize voice-driven commands to automate frequent tasks and normal text
