

3M™ M*Modal Fluency Direct compatibility with Greenway Health EHR systems

- Combine documentation creation and CDI into one workflow with CAPD
- Speech enable Greenway Health EHR systems so clinicians of any medical specialty can create better, faster and more complete documentation
- Create time to care with AI-powered closed loop clinical documentation system using CAPD functionality

The 3M advantage

The combination of 3M and M*Modal allows us to use our strengths to close the loop between care and revenue integrity.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

CAPD and CDI unified into one workflow

3M™ M*Modal Fluency Direct is engineered specifically for the needs of Greenway Health (Greenway) users to speech enable their electronic health record (EHR) system for faster and more comprehensive documentation. Fully compatible with Greenway applications, our solution includes speech understanding and embedded computer-assisted physician documentation (CAPD) functionality. 3M M*Modal offers a singular clinician workflow without compromising productivity by combining documentation creation and clinical documentation integrity (CDI).

CAPD provides real time, proactive feedback to clinicians in support of CDI, ICD-10 and documentation best practices based on the content of notes created via templates, typing or front-end speech recognition.

Fully supported systems

Greenway offers several different systems to support the unique needs of ambulatory practices of varying sizes. Each individual system caters to a different user population and is fully supported by 3M Fluency Direct inside and outside of virtual environments.

- Greenway PrimeSUITE™ is compatible with 3M to facilitate the use of direct dictation, single sign-on and a robust library of commands. Launched directly from the Greenway EHR, 3M Fluency Direct leverages a customized integration between the two systems to enable voice navigation, dictation, command and control. Both 3M Fluency Direct and the Greenway application are fully supported in virtual environments such as Citrix® XenApp, Microsoft® RemoteApp and Dell Workspace™.
- 3M M*Modal supports Greenway Intergy™, whether virtualized or installed locally, so that users can have complete text, command and control support natively within the EHR application.
