

3M™ M*Modal Fluency Direct for pathology

- Document the diagnosis and summary with a robust vocabulary of pathology terminology
- Dictate directly into lab information system
- Reduce the cost and delay associated with transcription

The 3M advantage

With M*Modal now part of 3M, we are combining our strengths to close the loop between clinical care and revenue integrity.

Our advanced 3M speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Specifically engineered for pathology

3M™ M*Modal Fluency Direct for pathology is designed to perform with high accuracy in the chaotic and noisy pathology grossing room environment. Although 3M Fluency Direct can't reduce the typical two-day pathology reporting time, it provides pathologists, physician assistants and histotechnicians the efficiency-enhancing tools they need to help eliminate the cost of transcription.

Pathology departments can also:

- Use 3M speech understanding to quickly document the diagnosis, summary, gross and microscopic descriptions using pathology-specific medical vocabulary
- Dictate directly and navigate around lab information systems (LIS) certified to work with 3M Fluency Direct such as Sunquest CoPath, Cerner® PathNet®, Epic Beaker, SCC SoftPath®, Orchard® Harvest™, etc.
- Reduce expense, delay and staffing concerns associated with reliance on transcription
- Utilize foot pedals, wireless headsets and other specialized hardware to remain hands-free during dictation
- Define speech-enabled commands, templates and normal text to automate frequent tasks
- Dictate reports anywhere with a readily available, cloud-based speech profile
- Leverage 3M Fluency Direct's integration with **3M™ M*Modal Fluency for Transcription** to optionally send audio files to a transcriptionist for a flexible and personalized workflow.
