

Everything you need
to know before you
tint your home.

3M™ Window Films 101

What are window films?

Window treatment applied to windows and glass surfaces, designed to reduce the amount of solar heat transmitted through the glass.

Protection from UV damage and fading.

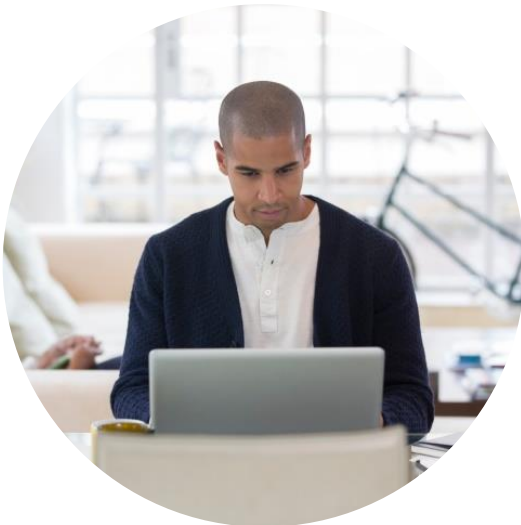

- Designed to reduce up to 78% of the sun's heat, while blocking up to 99% of the sun's harmful UV radiation, the single largest cause of fading.
- Skin Cancer Foundation recommends window film as a safeguard for UV damage.

Reduce glare.

Significantly reduce glare to help you work, relax and entertain without added eyestrain and discomfort.

Year-round insulation and savings.

3M™ Low-E Window Films are designed to retain heat during the winter and cool air during the summer, so you can save on heating and cooling costs all year-round.

How much does it cost to tint my home?

Things to consider:

- Product selected
- Windows size, shape and quantity
- Installation ease (single vs double storee house)
- Installer location and labour costs

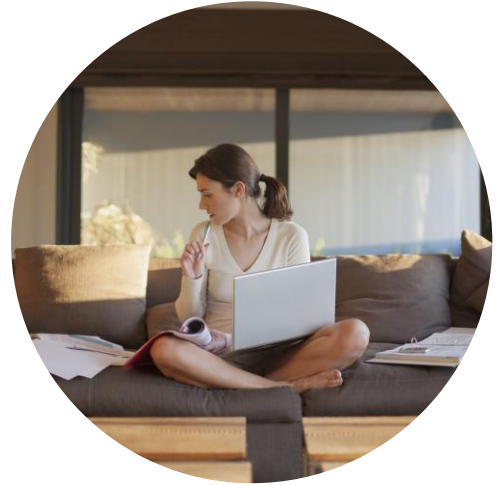

The cost can vary based on the above factors. An average starting point is approximately \$100- \$250 AUD per square metre of film installed according to WFAANZ*.

Window Films Energy Savings.

According to research conducted in Australia by CSIRO and 3M™, data shows that:

- Retrofitting existing glazing with 3M™ Solar Control Window Films can provide up to 17% of energy savings in residential houses across the whole year.
- Cooling Requirements during Summer in both Warm and Cold climates can be reduced by more than 30% by installing the 3M™ Solar Control Window Films

Will window tinting make my home dark or dull?

The stereotype that all tinting will make your windows a lot darker is not the case with 3M™ Window Films. 3M™ Prestige Window Films series lets the light in and not the heat.

3M™ Prestige Window Film Series target infrared radiation whilst allowing the high natural light transmission into your home providing excellent aesthetics.

Are 3M™ Window Films reliable?

Guaranteed

3M™ Window Films are backed by a limited lifetime warranty.

Trusted

3M™ was issued the first patent on sun control window film in 1966.

Proven

Our window films resist peeling, bubbling, scratching and abrasion. Films tested to extremes using the most advanced weathering facilities.
