

Skin protection

Irritated skin

3M™ Cavilon™ No Sting Barrier Film

Protects intact and damaged skin for up to 72 hrs – protecting it from liquids, irritants and friction. This clinically proven, unique barrier film dries quickly and leaves behind a wafer-thin, acrylic terpolymer film.

3M™ Cavilon™ Durable Barrier Cream

Offers a unique, long-lasting protection against body fluids and at the same time moisturises the skin.

3M™ Cavilon™ Advanced Skin Protectant

A high endurance skin protectant for covering and protecting intact or damaged skin. It forms a durable, thin elastomeric transparent film. The film adheres to dry, moist or wet skin surfaces and remains intact despite continuous or repeated exposure to moisture and/or corrosive irritants.
