

# Splittable Flying Splice Tape 7387

## Product Data Sheet

August 2016  
Supersedes: NEW

**Product Description** A splittable tape construction designed for straight-line flying splices, furnished with aggressive adhesives on both sides and a coated paper liner with liner score for easy manual application.

- Key Features**
- designed for straight-line flying splices for a variety of film substrates such as polyethylene, cast polypropylene & aluminium foil.
  - designed so that no fibres are present after splitting, thereby preventing contamination of the central impression drum and removing the need for costly cleaning to remove fiber residues after splicing.

### Physical Properties

<b>Adhesive Type Splicing side</b>	Rubber adhesive	
<b>Adhesive Type Reel side</b>	Acrylic adhesive	
<b>Tape Colour</b>	White (splicing side) White (reel side) Blue elliptic pattern inside	
<b>Carrier</b>	Splicing side: Paper Reel side: Paper	
<b>Thickness</b> (ASTM D-3652)	Before splitting	After splitting
Tape	0.281 mm	Splice side 0.117 mm
Liner	0.056 mm	Reel side 0.118 mm
Total	0.337 mm	
<b>Splittable Layer</b>	Fiber-free cleavable layer	
<b>Release Liner</b>	Coated easy-release paper	

### Physical Properties

<b>Repulability</b>	Construction is not repulpable
<b>Bonding Strength</b>	Designed for high affinity to film substrates

**Storage & Shelf Life**

Store at 16 °C – 27 °C and 40 – 60 % Relative Humidity in its original carton.

The product can be stored up to 12 months after production.

It is recommended to remove the protective liner just prior to splicing, rather than leaving film rolls with prepared splice patterns in storage without the protective liner.

**Important Notice**

All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method or application. All questions of liability relating to this product are governed by the terms of the sale subject, where applicable, to the prevailing law.

---

Values presented have been determined by standard test methods and are average values not to be used for specification purposes. Our recommendations on the use of our products are based on tests believed to be reliable but we would ask that you conduct your own tests to determine their suitability for your applications.

This is because 3M cannot accept any responsibility or liability direct or consequential for loss or damage caused as a result of our recommendations.
