

3M[™] Anodizing Masking Tape 8985L

Introducing an extreme masking solution for chromic acid anodization.

Designed to outperform competitive tapes in this harsh process, this specialized tape features a non-silicone formulation to help reduce post-process coating and bonding failures. It can be used with or without chemical film on a variety of aluminum alloys. Plus, it features a transparent color with a high-visibility printed backing for fast positioning and removal and it's linered for easy die-cutting.

Reliability

Get consistency and peace of mind with a non-silicone tape that won't introduce contamination in the production process.

Performance

Replace messy, labor-intensive liquids with a reliable tape solution that's built specifically for chemical resistance to chromic acid.

Productivity

Mask and de-mask up to 5x faster than liquids! Eliminate rework, extreme leakage or scrapped parts with excellent masking lines and clean, easy removal.

Target problems we're solving:

- Slow masking application production times.
- Adhesive residue or leakage from an existing tape solution.
- Non-silicone requirements mandated by a customer.
- Lack of storage space for parts while liquid masks cure.
- Downstream silicone contamination.

3M Strengths

Features

High performance adhesive

Specially engineered for chromic acid

Non-silicone adhesive

Advantages

Saves labor time

Promotes easy, clean removal

Doesn't leave a silicone film on part surface

Benefits

Increased profits

Increased productivity

Helps reduce rejected parts from their end users

• Productivity

Qualifying Questions

- Do you currently use chromic acid in your anodizing processes?
- Is there a specification or controlling document around this process?
- Do you have a non-silicone policy in your plant or processes?
- Do you use a tape, liquid or both in your masking processes?

Questions to Identify Needs

Ask these questions to uncover customer issues or relationship status with their current supplier:

- Do you have rework related to residue transfer and/or chemical leakage?
- When using a liquid, how much time does it take to pre-mask, apply, cure and remove?
- Do you ever have quality issues from your end users in relation to silicone contamination?
- Is your liquid masking product challenging to remove? Can you tell me more about it?
- Where is your current supplier located? How is their service?

Questions to Drive the Decision Process

Ask these questions to invite the customer to take action:

- If you could avoid rework, how many more parts could you produce?
- What are your test protocols and when could we potentially test the 8985L?
- If you were able to speed up your process, what would that mean for your facility and your customers?

Target Markets

 Facilities specializing in anodization

Target Titles

- Purchasing Manager
- Coating Supervisor
- Process Engineer
- Product Engineer
- Quality Manager
- Purchasing Manager

Target NAICS Codes

- Aircraft Parts/Engine 336413/336412
- Electroplating Plating/ Metal Coating 332813/332812

Objections to Overcome

"The tape I use is much cheaper than your tape."

Response

We make a variety of tapes at different price levels and constructions. Each of these tapes work well in a variety of baths. The new 8985L is made specifically for chromic baths. While customers have found this to be the best choice in relation to labor savings and process speed in chromic baths, every company's process is different. We have several tapes used in anodizing that we could help you test.

"I want one tape for all my anodizing baths."

Response

While 8985L was designed with chromic acid in mind, several customers have had success with the tape in a variety of baths.

Product Selection and Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. As a result, customer is solely responsible for evaluating the product and determining whether it is appropriate and suitable for customer's application, including conducting a workplace hazard assessment and reviewing all applicable regulations and standards (e.g., OSHA, ANSI, etc.). Failure to properly evaluate, select, and use a 3M product and appropriate safety products, or to meet all applicable safety regulations, may result in injury, sickness, death, and/or harm to property.

Warranty, Limited Remedy, and Disclaimer: Unless a different warranty is specifically stated on the applicable 3M product packaging or product literature (in which case such warranty governs), 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE. If a 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except for the limited remedy stated above, and except to the extent prohibited by law, 3M will not be liable for any loss or damage arising from or related to the 3M product, whether direct, indirect, special, incidental, or consequential (including, but not limited to, lost profits or business opportunity), regardless of the legal or equitable theory asserted, including, but not limited to, warranty, contract, negligence, or strict liability.
