

3M™ M*Modal Fluency Direct compatibility with Netsmart CareRecords™

- Combines documentation creation and CDI into one workflow with CAPD
- Creates time to care by enabling clinicians of any health care specialty to dictate higher quality clinical notes directly into the EHR
- A single, cloud-based user speech profile allows clinicians to dictate from multiple locations as they move between facility rooms, office and home

The 3M advantage

The combination of 3M and M*Modal allows us to use our strengths to close the loop between care and revenue integrity. Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable clinicians to spend more time providing care.

Complete, compliant and real time documentation

The 3M™ M*Modal Fluency Direct partnership with Netsmart gives users access to a proprietary blend of advanced speech recognition and natural language understanding (NLU) technologies that improve clinical documentation speed and accuracy. Embedded computer-assisted physician documentation (CAPD) functionality also combines documentation creation and clinical documentation integrity (CDI) into a single workflow.

3M Fluency Direct can be used with any Netsmart CareRecord, though some solutions have additional functionality.

- **myAvatar™** users have full dictation, command, control and correction support via Windows devices. In addition, users can query medication, diagnosis, labs and recent vitals from the patient record and insert them in the note where the cursor has been placed. Along with insert commands, the custom template commands can be configured.
- **myEvolv®** users have full dictation, command, control and correction support via Windows devices.
- **CareManager™** users have full dictation, command, control and correction support via Windows devices.
- **myUnity™** users have full dictation, command, control and correction support via Windows devices.
