

# Reimagine clinical documentation integrity

## An all-in-one solution

Clinical documentation integrity (CDI) is a crucial, but resource intensive, element of effective revenue cycle operations. Quality initiatives, care coordination and accurate reimbursement all rely on the integrity of clinical documentation. Provider organizations all need the benefits of CDI but many struggle to overcome the challenges involved with running a program, including:

### People

- Recruiting and hiring
- Managing
- Retaining
- Funding

### Process

- Education
- Training
- Ensuring best practice workflows

### Technology

- Funding
- Implementing
- Training
- Maintaining
- Optimizing

## Consider a new approach: Total CDI outsourcing.

With this novel outsourcing model, 3M brings a complete solution to deliver the benefits of a highly effective CDI program without the operational challenges of running an in-house program.

## What does it look like for you?

### Outsourced staffing and operations

Highly trained CDI staff and management review records for documentation integrity to deliver real impact to quality, cost and case mix.

### Cloud-based technology

Minimize IT burden with modern, cloud-based CDI technology that interfaces directly with your EHR. Efficient collaboration ties workflows together for smooth operations.

With this model, 3M is your partner, committed to your success. You'll have access to our experts and dedicated support to help you achieve your CDI goals.

Connect with your 3M representative to find out what total CDI outsourcing could mean for you.
