3M™ DBI-SALA® Flexiguard™ – Product Color Change
(yellow to bright green) & Spare Parts Program Details
PUBLIC DOCUMENT

Dear Customers,

Continuing with our 3M™ DBI-SALA® Flexiguard™ portfolio line updates & alignment, we are moving forward with the color modification on all our offered solutions at once. The color change consists of a full migration from our current “yellow” color to a new “bright green” color. This new color has demonstrated better visibility features on site, improving the safety of the workplace when using our products.

None of this change in color will affect the current system configuration or the solution offered. Some of the part numbers have changed so please refer to the list attached for the most current information on the crossover. All orders placed before December 31st, 2020 will be served accordingly as quoted, but all new orders will be served with the new “bright green” color, due to previous “yellow” colored systems will no longer be commercialized.

A spare part program will be open for the customers that previously bought any of our “yellow” colored solutions. The program will be valid until December 30th, 2022.

Kind regards,

Nicolás Lobo-Guerrero Sanz
