January 2021

NOTICE: 3M™ Scotch-Weld Manual & Pneumatic Applicators and Nozzle Transitions

To Our Valued Customers:

This notice is regarding 3M™ Scotch-Weld™ EPX™ Manual and Pneumatic Applicators (400 and 490 mL sizes) as well as the 3M™ Scotch-Weld™ EPX™ Mixing Nozzle Square Gold.

We are introducing new, upgraded designs of our primary manual and pneumatic applicators in 2021. These new applicator designs are completely compatible with all existing 3M™ Scotch-Weld™ structural adhesive cartridges and nozzles. There will be no change in cost with the new applicator models. All warranty information will remain the same as well.

The list of products that are included in this transition are below:

Legacy Description	Legacy ID	SAP ID	New Description	New Legacy ID	New SAP ID
400 ML Manual EPX Applicator	DE272929725	7000043081	3M™ Scotch-Weld™ EPX DM2X Manual Applicator, 400 mL	UU011213426	7100244651
490 ML Manual EPX Applicator	62918299306	7100015958	3M™ Scotch-Weld™ EPX DM2X Manual Applicator, 490 mL	UU011213442	7100244652
45 ML Pneumatic EPX Applicator	NEW!		3M™ Scotch-Weld™ EPX Pneumatic Gun DP2-50-400, 45ml	UU008277327	7100147720
400 ML Pneumatic EPX Applicator	XS003401352	7000110542	3M™ Scotch-Weld™ EPX DP2X Pneumatic Applicator 400 mL	UU011033154	7100230151
490 ML Pneumatic EPX Applicator	DE272970091	7000062908	3M™ Scotch-Weld™ EPX DP2X Pneumatic Applicator, 490 mL	UU011053210	7100244653

The new designed Pneumatic Applicators (400 & 490 mL) will feature the following changes:

What's different:

- Integrated pressure regulator
- Improved ergonomics
- Air input from ¼" FNPT to ¼" MNPT
- Integrated PTFE seal on air input eliminates need for PTFE tape for airtight seal to quick release
- Elimination of pin trigger – please read full user instructions and note ALL safety warnings as indicated

What's the same:

- Basic functionality
- Indicator rod displaying adhesive use
- Mounting hook for tool balancer
- Plunger retract button
- Cartridge release button

The new designed Manual Applicators (400 & 490 mL) will feature the following changes:

What's different:

- Improved ergonomics

What's the same:

- Basic functionality
- Mounting hook for tool balancer
- Plunger retract button
- Cartridge release button
- Thumb-actuated brake release

The new designed applicators will become available as current inventory of the existing dispenser models are depleted. We estimate this transition to occur around February 2021. New item #s will need to be set up in channel partner systems. We will not be accepting returns of any of the “old” models once the new designs are available (unless the return is due to a quality issue or concern).

In addition to the dispenser change, the country of origin will be changing for the set of nozzles in the list below. As a result, we will need to create new stock # to reflect this change. Nothing else is changing with this product but new item # will need to be set up in channel partner systems. We expect to make this change-over around May of 2021. Again, nothing about the tooling, design, raw materials, pack-outs or price are changing with these nozzles – just the item # or stock #.

Legacy ID	SAP ID	SAP Basic Data Text	New Legacy ID	New SAP ID
62917691271	7000028616	3M™ Scotch-Weld™ EPX Mixing Nozzle, Square Gold, 200mL and 400mL, 36 nozzles/case	62917691289	7100247630

NOTICE: 3M™ Scotch-Weld Manual Applicators for small cartridges

Our manual applicator for small cartridges (ID: 7100205939) now comes with the plunger for 1:1/2:1 and 10:1 adhesives in the packaging. The 10:1 plunger no longer need to be ordered separately.

If you have any questions at all about these transitions, please contact your local 3M Adhesives Sales Representative or call 3M Customer Service. Thank you for your attention to these changes.

Regards,

Simon Buyse
