

# 3M Health Information Systems now offers a complete suite of solutions to calculate accurate Medicare pricing for all care settings.

The Medicare payment amount, a predetermined, fixed amount, for a particular service is derived based on the classification system of that service. For example, diagnosis-related groups for inpatient hospital services. The Centers for Medicare & Medicaid Services (CMS) use separate prospective payment systems for reimbursement to all sites of service.

3M now offers a complete suite of solutions for grouping, editing and pricing logic and data you will need to accurately calculate payment for all care settings.

Also available are CMS public domain edits appropriate for the claim type, as well as a full suite of 3M proprietary edits, to help you ensure compliant payment and prevent overpayments.

Regardless of content, 3M offers standard platforms for Windows desktop, **3M™ Core Grouping Software**, and cloud-based, **3M™ Grouper Plus Content Services**, which provide a consistent interface and streamlined technical integration. 3M CGS and 3M GPCS both offer frequent and timely updates allowing you to receive regulatory changes prior to the effective date. Your license also includes implementation guidance and ongoing assistance from our expert 3M support team.
