Automatic-Transfer, Added Peace-of-mind.

The Ska-Pak AT respirator is the most advanced pressure demand supplied air respirator from 3M Scott Fire & Safety, equipped with the added benefit of a patented, automatic, hands-free air transfer capability.

If the primary air supply to the respirator is interrupted, the air source is instantly switched to the portable air cylinder without user intervention. Upon transfer, the Vibralert tactile alarm system activates, vibrating the user's facepiece and alerting the user that the respirator has transferred to cylinder air.

The Ska-Pak AT supplied air respirator is ideal for many applications, including confined space operations, hazardous materials clean-up and maintenance jobs for numerous markets, including chemical, petrochemical, oil and gas, ship building and public utilities.

Product Highlights

• Combination Type C positive pressure respirator with escape cylinder for entry and escape from hazardous, confined space or immediately dangerous to life or health (IDLH) situations

• Automatic, hands-free transfer from external air source to cylinder in the event of primary air source interruption to help reduce worker panic

• Personal, tactile Vibralert alarm to alert users of transfer to cylinder air and enable prompt escape

• Onboard cylinder gauge and 90% air remaining lighted alarm for added safety and awareness

• E-Z Klip cylinder retention system for quick and easy cylinder changes

• Three harness styles:
  - Padded Polypropylene - chemically resistant and lightweight
  - Padded Kevlar® - ideal in high heat environments or when there is potential for sparking
  - Integrated Full Body Harness - ideal for confined space applications

### Cylinder Options

- 15-minute 4500 psi carbon
- 10-minute 3000 psi carbon
- 5-minute 3000 psi carbon
- 3-minute 2216 psi aluminum

### Air Line Fitting

Available with Hansen, Schrader, Cejn, Hansen HK plug or Hansen HK socket fittings.

### Facepieces

- Kevlar®
- Nylon
- Polyester
- Rubber

### Harness

- Nylon
- Kevlar®

### Part Number

Select a one- or two-digit number per box from the chart above that corresponds to your choice.

* In these examples, order facepiece and case separately.

### Hands-Free to help Reduce Panic

The Ska-Pak AT is a Type C combination supplied air respirator with the added benefit of automatic, hands-free transfer capability. If your primary air source is interrupted, you are automatically transferred to your egress air cylinder.

### Regulator

The E-Z Flo pressure demand regulator with Vibralert tactile alarm notifies the wearer of transfer to cylinder air by vibrating the facepiece.

### EOSTI

A pressure gauge and flashing electronic indicator notifies the user of cylinder status and alerts the user when cylinder pressure is low.

### Harness

The nylon and Kevlar® harnesses are lightweight with padded adjustable shoulder straps for maximum comfort. An integrated full-body harness (FBH) is also available, ideal for confined space applications.

### Cylinder Options

The Ska-Pak AT Supplied Air Respirator is available with numerous rated cylinders, featuring the E-Z Klip cylinder retention system:
- 3-minute 2216 psi aluminum
- 5-minute 3000 psi carbon
- 10-minute 3000 psi carbon
- 15-minute 4500 psi carbon

### Facepieces

The Ska-Pak AT Supplied Air Respirator is used with the AV-Series facepieces which feature the 3M Scott Top-Down Convertibility platform, allowing one facepiece to be used in numerous respiratory protection applications, from supplied air to air purified. This one-facepiece concept reduces inventory and training costs and eliminates the need to fit-test multiple facepieces for each employee.
