3M™ M*Modal Fluency Direct™ Software Compatibility with MEDITECH

- **Ranked #1 Best in KLAS for Speech Recognition, Front-End EMR for four consecutive years, including 2020**
- **Create time to care while improving physician efficiency and user experience**
- **Fully integrated speech recognition with all MEDITECH systems**

The 3M Advantage

With M*Modal now part of 3M, we are combining our strengths to close the loop between clinical care and documentation quality.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Top-ranking speech recognition solution streamlines physician documentation.

3M™ M*Modal Fluency Direct is the only speech recognition solution fully integrated with all MEDITECH systems. Whether your system of choice is Expanse™, 6.x™, Client/Server™ or MAGIC™, 3M Fluency Direct enables physicians to dictate directly into the electronic health record (EHR). It supports full command, control and edit capabilities without the need for first dictating into an external window. Ranked #1 Best in KLAS, Speech Recognition Front-End EMR for four consecutive years (2020, 2019, 2018, 2017), 3M Fluency Direct streamlines the physician documentation process within the EHR, thereby creating time to care while improving efficiency and user experience.

Speech and artificial intelligence (AI)-powered 3M Fluency Direct is fully integrated with every MEDITECH EHR platform. This enables your organization to smoothly migrate to newer MEDITECH systems, such as Expanse, without users having to define new commands, templates and be trained on a new speech recognition system.

Expanse is MEDITECH's new web-based acute and ambulatory system. Cloud-based 3M Fluency Direct's automatic support for web browser technology and integration with MEDITECH JavaScript Application Programing Interfaces (APIs) means that users of Expanse have full dictation, command, control and correction support.

6.x systems are automatically supported by 3M Fluency Direct via APIs for free-form dictation, auto-capitalization, text editing, command and control.

Client/server's integration with 3M Fluency Direct enables users to dictate directly in the EHR. Our robust integration with this system allows for speech commands to automate navigation through the application and correct text if needed.

MAGIC is built on MEDITECH's original technology and is delivered via the MEDITECH workstation. 3M Fluency Direct allows full text, auto-capitalization, command and control support via an integration with MEDITECH APIs. Users can dictate directly into MAGIC without the need to transfer text from external windows by just putting the cursor in the application and dictating.
