3M™ M*Modal Fluency Direct™ Software Compatibility with Allscripts Systems

- Ranked #1 Best in KLAS for Speech Recognition, Front-End EMR for four consecutive years, including 2020
- Speech enable Allscripts EHR systems so that clinicians of any medical specialty can create better, faster and more complete documentation
- Create time to care with an artificial intelligence (AI)-powered closed-loop clinical documentation system using computer-assisted physician documentation (CAPD) functionality

The 3M Advantage

With M*Modal now part of 3M, we are combining our strengths to close the loop between clinical care and documentation quality.

Our advanced speech understanding solution is designed to optimize the EHR experience, drive higher quality documentation and enable physicians to spend more time with their patients.

Unified workflow.

Cloud-based **3M™ M*Modal Fluency Direct** is engineered to support Allscripts acute care and ambulatory electronic health records (EHRs). AI-powered CAPD combines documentation creation and clinical documentation integrity (CDI) into a unified workflow.

All Allscripts acute care and ambulatory EHRs are fully supported by 3M, both inside and outside virtual environments, including:

- Allscripts Sunrise™ is supported in a Citrix® environment and fully compatible with 3M Fluency Direct for easy access to direct dictation, single sign-on and a robust library of commands. The technology provides real-time, automated CAPD feedback to clinicians as the note is created in the EHR via templates, typing, dot phrases or real-time speech recognition. This optimizes physician workflows by delivering timely, context-specific and high-value feedback to doctors proactively in support of CDI, ICD-10 and best practices.

- Allscripts TouchWorks® is fully compatible with 3M Fluency Direct, whether it is deployed virtually or locally, so that users can have complete text, command-and-control support natively within the application. 3M CAPD technology can also deliver physician-assistive insights on underspecified conditions or complexity of care, as well as patient disease states, problems and care needs at the point of care and within EHR documentation workflows.

- Allscripts Paragon™, the web-based EHR, is fully compatible with 3M Fluency Direct and CAPD technology for a smart, speech-driven workflow to improve physician efficiency and satisfaction, thereby improving documentation quality and creating time to care for doctors.

- Allscripts Professional™ is compatible with 3M Fluency Direct to enable automatic support for text controls, allowing for free-form dictation as well as command and control. 3M's technology can support all virtual deployments including those hosted by Allscripts.
