Case Study: 3M™ Clarity™ Aligners

Deep bite correction with mild to moderate crowding

Age: 27

Chief concern: Space between front teeth

Case diagnostics: Class I occlusion with palatally impinging deep bite. Mild/moderate lower crowding, upper spacing, and upper laterals with tooth size discrepancy

Total number of aligners: 56  
(25 initial Tx Design, 16 refinement #1, 15 refinement #2)

Wear interval: Started at two weeks and transitioned to weekly

Treatment time: 16 months of active treatment
Retracted buccal – right

Retracted anterior biting

Retracted buccal – left
