3M™ Stone Floor Protection System

Now there's an easier solution to restore, protect and maintain the beauty of your concrete, terrazzo, marble, and other porous stone surfaces.

Refinish floor surfaces in fewer steps, creating a long-lasting, high-traction shine that resists scuffs, stains and scratches. You can have durable floors that require less stripping and scrubbing — reducing chemical use. It all adds up to reduced labor and maintenance costs.

Calculate the savings

Over the life of your floors, less labor and more durability add up to increased ROI. To compare the costs of acrylic finishes with those of the 3M™ Stone Floor Protection System, download the COSMO app and use our savings calculator at 3M.com/floorcare.
