3M™ V.A.C.® Ulta 4 Therapy Unit with 3M™ Smart Instill™ Feature

The 3M™ V.A.C.® Ulta Therapy Unit is an integrated wound management Unit for the acute setting that provides Negative Pressure Wound Therapy (3M™ V.A.C.® Therapy) with an instillation option (3M™ Veraflo™ Therapy).

The instillation option (3M™ Veraflo™ Therapy) is indicated for patients who would benefit from vacuum assisted drainage and controlled delivery of topical wound solutions and suspensions over the wound bed. Negative Pressure Wound Therapy (V.A.C.® Therapy) is intended to create an environment that promotes wound healing by secondary or tertiary (delayed primary) intention by:

- ▶ Preparing the wound bed for closure
- ▶ Reducing edema
- ▶ Promoting granulation tissue formation and perfusion
- ▶ Removing exudate and infectious material

3M™ V.A.C.® Ulta Therapy Unit – key features

- ▶ 3M™ Veraflo™ Therapy combines the benefits of 3M™ V.A.C.® Therapy with automated solution distribution and removal, now with the 3M™ Smart Instill™ Feature, that automatically determines volume to instill-preventing over/under filling the dressing
- ▶ Fill assist: Allows manual customization to monitor the initial instill volume and saves data for future use when in Veraflo Therapy mode
- ▶ 3M™ SensaT.R.A.C.™ Technology ensures the prescribed negative pressure level is maintained at the wound site for optimal healing outcomes
- ▶ 3M™ Seal Check™ Leak Detector helps clinicians and patients identify and troubleshoot dressing leaks
- ▶ 3M™ Easyclear Purge™ Technology forces positive air periodically through outer lumen of the tube to aid in the prevention and clearance of blockages
- ▶ Preprogrammed therapy settings align to global advisory recommendations!
- ▶ Animated troubleshooting, customizable alarms and instillation postpone feature
- ▶ DPC (Dynamic Pressure Control) maintains a low level of negative pressure at the wound site between cycles

Product description

Available on request in specific countries only

3M™ V.A.C.® Ulta 4 Therapy Unit

3M™ V.A.C.® Ulta 4 Therapy Unit with the 3M™ Smart Instill™ Feature

3M™ V.A.C.® Ulta 4 Therapy System is an integrated wound management Unit, for acute care settings, that provide four separate, distinct, Negative Pressure Wound Therapies: 3M™ V.A.C.® Therapy, 3M™ V.A.C. Veraflo™ Therapy, 3M™ AbThera™ Open Abdomen Therapy and 3M™ Prevena™ Incision Therapy in one device.

What are the four therapies?

3M™ V.A.C.® Therapy

Negative Pressure Wound Therapy designed to deliver the wound healing benefits of V.A.C.® Therapy with patented 3M™ SensaT.R.A.C.™ Technology.

3M™ Veraflo Therapy

Combines the benefits of V.A.C.® Therapy with automated delivery, soak and removal of topical wound solution.

3M™ Prevena™ Incision Therapy

Negative Pressure Therapy designed specifically for the management of closed surgical incisions.

3M™ AbThera™ Open Abdomen Therapy

Negative Pressure Therapy designed to facilitate management of the open abdomen and help achieve primary fascial closure.

Why use 3M™ V.A.C.® Ulta 4 Therapy System?

V.A.C.® Ulta 4 Therapy System provides the convenience of four Negative Pressure Wound Therapies in one simple, easy to use device. Start therapy in fewer steps with the V.A.C.® Ulta 4 Therapy Unit. Easier initiation of V.A.C.® Therapy, Veraflo Therapy, Prevena Therapy and AbThera Therapy.

Product description

3M™ V.A.C.® Ulta 4 Therapy System

3M™ ActiV.A.C.™ Therapy Unit

3M™ ActiV.A.C.™ Therapy Unit is a portable Negative Pressure Wound Therapy designed for the ambulatory patient. It is used with 3M™ V.A.C.® Therapy Dressings and features:

- ▶ 3M™ SensaT.R.A.C.™ Technology to ensure programmed negative pressure at wound site
- ▶ 3M™ Seal Check™ Leak Detector – to help clinicians identify and troubleshoot dressing leaks
- ▶ Ease of use through pre-programmed settings documents patient compliance
- ▶ Simplified touch screen

Why use 3M™ ActiV.A.C.™ Therapy Unit?

ActiV.A.C. Therapy Unit is ideal for patients transitioning to home care:

- ▶ Lightweight. Weighs only 1.08kg
- ▶ Small size with a low profile that can be worn close to the body
- ▶ Easy-to-use, single-touch therapy on/off operation
- ▶ Alarm notifications that are easy to recognise and correct.
- ▶ Easy, quick release 300ml canister
- ▶ 14-hour battery for activities of daily living (depending on the dressing and setting)

Product code	Product description
Available on request	3M™ ActiV.A.C.™ Therapy Unit

3M™ V.A.C.® Simplicity™ Therapy Unit

3M™ V.A.C.® Simplicity Therapy Unit is a pre-set Unit designed to deliver the most commonly prescribed therapy with fewer steps – keeping it simple for both patients and clinicians.

- ▶ For mobile patients or patient transition
- ▶ Easy to handle, simple user interface
- ▶ Supports patient mobility
- ▶ Minimal training for clinicians and patients
- ▶ 3M™ SensaT.R.A.C.™ Technology
- ▶ Acoustic alarm information
- ▶ 8 hours battery capacity
- ▶ Continuous therapy of pre-set -125mmHg

Why use 3M™ V.A.C.® Simplicity Therapy Unit?

V.A.C.® Simplicity Therapy Unit only requires minimal training time and facilitates a seamless transition.

Easy: Simple and intuitive interface with no settings to learn.

Compatible: 3M™ V.A.C.® Dressings can be used with the V.A.C.® Simplicity Therapy Unit.

Product description

3M™ V.A.C.® Simplicity™ Therapy Unit

3M™ V.A.C.® Rx4 Therapy Unit

3M™ V.A.C.® Rx4 Therapy Unit features four individually controlled channels in a single unit for the efficiency in treating two or more wounds.

- ▶ Features 3M™ SensaT.R.A.C™ Technology
- ▶ Designed to manage the complexities of multiple wounds with a single unit
- ▶ Intended to be used only in acute care settings
- ▶ Easy-to-use interface for complex military combat and trauma environments

Why use 3M™ V.A.C.® Rx4 Therapy Unit?

The V.A.C.® Rx4 Therapy Unit provides you with an easy-to-use interface ability to treat up to four wounds with one solidly built, insusceptible Unit.

Leverage the economic benefit for your hospital:

- ▶ Less purchase or rental costs
- ▶ Effectiveness of the therapy by not treating multiple wounds with a device intended to treat only a single wound
- ▶ Less facility time
- ▶ Less effort for the staff
- ▶ Less storage space needed

Compatible with many of your preferred dressings and canisters.

Product description

3M™ V.A.C.® Rx4 Therapy Unit

3M™ V.A.C.® Via Therapy System

The 3M™ V.A.C. Via Therapy Unit is small, lightweight, portable and easy to use. Its features include:

- ▶ 3M™ SensaT.R.A.C.™ Technology to ensure accurate delivery of set Negative Pressure Wound Therapy
- ▶ Disposable Unit for 1-patient use
- ▶ For use in outpatient and clinic setting
- ▶ Dynamic pressure control or continuous negative pressure for selection (-75 mmHg or -125 mmHg)
- ▶ Low exudating (<80ml/day), small to medium – sized wounds equal to or smaller than the size of the 3M™ V.A.C.® Granufoam™ Dressing, Medium

3M™ V.A.C.® Via Therapy System 7-Day Kit is a seven day therapy solution. Ideal for remote NPWT.

3M™ V.A.C.® Granufoam™ Dressing Kit

An open-pored, reticulated polyurethane foam for use with 3M™ V.A.C.® Therapy Units, designed to promote granulation tissue formation and enhance exudate removal. 3M™ V.A.C.® Granufoam™ Dressings can be used on a wide variety of wounds.

Use 3M™ V.A.C.® Granufoam™ Dressings Kits with 3M™ V.A.C.® Therapy Units

V.A.C.® Granufoam™ Dressing when used in conjunction with V.A.C.® Therapy Units promotes granulation tissue formation while providing a closed, moist wound healing environment.

V.A.C.® Granufoam™ Dressing can be easily trimmed to fit the contours of deep or irregularly shaped wounds and are available in a variety of configurations for bridging techniques and offloading when treating multiple wounds.

Pad, 1 x sheet of 3M™ V.A.C.® Drape, 1 x sheet of perforated 3M™ V.A.C.® Drape with pre-cut hole, 1 x disposable ruler/foam quantity label

3M™ V.A.C.® Granufoam Silver™ Dressing

An open-celled, reticulated polyurethane foam that has been microbonded with metallic silver via a proprietary metallisation process, providing a barrier to bacterial penetration.

Why use 3M™ V.A.C.® Therapy Units with 3M™ V.A.C.® Granufoam Silver™ Dressing for chronic, critically colonised, or infected wounds?

- ▶ It is the only silver dressing, that allows the 3M™ V.A.C.® Granufoam™ Dressing pores to come in direct contact with the wound, eliminating the need for additional silver dressing layers that may inhibit negative pressure and granulation
- ▶ Micro-bonded metallic silver is uniformly distributed throughout the dressing, providing silver even after sizing
- ▶ Easy-to-use: A single application of V.A.C.® Granufoam Silver™ Dressing eliminates the need for adjunct silver dressings

*When used in conjunction with good clinical practice, such as appropriate use of sharp debridement and/or antibiotics.

Product code	Product description	Every sterile pouch contains

3M™ V.A.C. Dermatac™ Drape

The first-ever silicone-acrylic hybrid drape for use with 3M™ V.A.C.® Therapy Units. Clinicians using 3M™ V.A.C. Dermatac™ Drape during a 5-patient case study, noted that the hybrid drape was easy to place and read just upon initial placement, improving the ease of dressing changes.⁹

Intelligently conforms and contours

- ▶ Adapts to the body and provides a tight seal – even in uneven areas
- ▶ Conforms to different anatomical locations and can be repositioned upon initial placement and removal

Saves time for clinicians

- ▶ Less training as drape is easier to apply
- ▶ 33% reduction in dressing application time compared to standard 3M™ V.A.C.® Therapy^{10,11}

User-friendly handling for reduced waste

- ▶ Detaches without difficulty when stuck to gloves or itself
- ▶ Easy to smooth out wrinkles and reposition during dressing application without loss of adhesion

75% of clinicians (18/24)¹² found that with 3M™ V.A.C. Dermatac™ Drape there was...

- ▶ Less drape needed at dressing changes.
- ▶ Less need to window pane
- ▶ No need for ancillary products to help with seal

An internal bench testing has shown 3M™ Cavilon™ Advanced Skin Protectant is not compatible with 3M™ V.A.C. Dermatac™ Drape, and the usage of 3M™ Cavilon™ No Sting Barrier Film (NSBF) with V.A.C. Dermatac Drape is not recommended.

3M™ V.A.C. Whitefoam™ Dressing

3M™ V.A.C. Whitefoam Dressings are a versatile Polyvinyl Alcohol (PVA) Dressing for use with 3M™ V.A.C.® Therapy Units. It is recommended when granulation tissue needs to be controlled for a more comfortable dressing change and can be used:

- ▶ For situations where hypergranulation responses are likely
- ▶ For tunnels and undermining
- ▶ To bolster split thickness grafts which may help minimising discomfort

Why use 3M™ V.A.C.® Therapy with 3M™ V.A.C Whitefoam Dressings?

- ▶ Higher tensile strength facilitating removal from tunnels and undermining
- ▶ Open cell non-reticulated properties to help minimise in growth of granulation tissue for a more comfortable dressing change
- ▶ Less adherent material than 3M™ V.A.C.® Granufoam™ Dressing for use as a bolster for skin grafts
- ▶ Pre moistened with sterile water

3M™ V.A.C.® Simplace™ Ex Dressing Kits

Designed to simplify the 3M™ V.A.C.® Dressing application process, 3M™ V.A.C.® Simplace™ Ex Dressing are an open-pored, reticulated polyurethane foam for use with 3M™ V.A.C.® Therapy Units, designed to promote granulation tissue formation and enhance exudate removal.

Why use 3M™ V.A.C.® Therapy with 3M™ V.A.C.® Simplace™ Ex Dressings?

V.A.C.® Simplace™ Ex Dressings have been specifically designed to simplify the 3M™ V.A.C.® Therapy dressing placement process. Spiral-cut foam is simple to size, no scissors necessary, allowing for fewer steps and faster application.

Product code	Product description	Every sterile pouch contains

VIACAN05	3M™ V.A.C.® Via Canister, 5-pack	250ml capacity, with Isolzyzer®

3M™ Veraflo™ Dressing

Veraflo Therapy combines the benefits of NPWT (3M™ V.A.C.® Therapy) coupled with automated, controlled delivery of topical wound treatment solutions to and from the wound bed. Therapy is delivered in automated instillation cycles allowing wounds to be repetitively cleansed without the need for dressing removal.

Why use 3M™ V.A.C. Veraflo™ Dressing with 3M™ Veraflo™ Therapy?

- ▶ Helps facilitate the removal of infectious material and other wound bioburden
- ▶ To be considered when the wound needs a combination of granulation and cleansing
- ▶ Use V.A.C. Veraflo Dressings for open wounds, when the main goal of the therapy is granulation, along with effective wound cleansing

Product code	Product description	Every sterile pouch contains
ULTVFL05SM	3M™ V.A.C.® Veraflo™ Dressing Small, 5-pack	2 x foam dressings (11 x 8 x 1.8cm), 2 sheets of 3M™ V.A.C.® Advanced Drape, 1 packet of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Pad, 1 x disposable ruler/foam quantity label
ULTVFL05MD	3M™ V.A.C.® Veraflo™ Dressing Medium, 5-pack	2 x foam dressings (17 x 15 x 1.8cm), 3 sheets of 3M™ V.A.C.® Advanced Drape, 2 packets of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Pad, 1 x disposable ruler/foam quantity label
ULTVFL05LG	3M™ V.A.C.® Veraflo™ Dressing Large, 5-pack	2 x foam dressings (25 x 15 x 1.6cm), 5 sheets of 3M™ V.A.C.® Advanced Drape, 4 packets of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Duo Tube Set, 1 x disposable ruler/foam quantity label

3M™ V.A.C. Veraflo Cleanse™ Dressing

This tubular shaped dressing is designed specifically for 3M™ Veraflo™ Therapy to allow even distribution and removal of topical wound solutions across the wound bed.

To be used when granulation is **not** a primary treatment goal at this time in the wound healing process, but for effective wound cleansing, particularly cavity wounds or wounds with complex geometries.

Why use 3M™ V.A.C. Veraflo Cleanse™ Dressings with Veraflo Therapy?

- ▶ To initiate wound cleansing by facilitating the removal of infectious material and other wound bioburden
- ▶ Designed for easy application into tunnelling and undermining
- ▶ Use V.A.C. Veraflo Cleanse Dressing for wounds with complex geometries, including explored tunnels or undermining where the distal aspect is not visible

Product code	Product description	Every sterile pouch contains
ULTVCL05MD	3M™ V.A.C. Veraflo Cleanse™ Dressing – Medium, 5-pack	1 x foam dressing (61 x 3.2cm diameter), 3 sheets of 3M™ V.A.C.® Advanced Drape, 2 packets of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Pad, 1 x disposable ruler/foam quantity label

3M™ V.A.C. Veraflo Cleanse Choice™ Dressing

The 3M™ V.A.C. Veraflo Cleanse Choice™ Dressing, in conjunction with 3M™ Veraflo™ Therapy, can be used to cleanse the wound, promote wound healing and facilitate the removal of infectious materials.

Why use 3M™ V.A.C. Veraflo Cleanse Choice™ Dressings with 3M™ Veraflo™ Therapy?

- ▶ Provides mechanical movement at the wound surface in combination with cyclic delivery and dwell of topical solutions which facilitates removal of thick wound exudate, such as fibrin, slough and other infectious materials
- ▶ Provides clinicians with another option to help clean large complex wounds when complete surgical debridement is not possible or appropriate

Product code	Product description	Every sterile pouch contains
ULTVCC05MD	3M™ V.A.C. Veraflo Cleanse Choice™ Dressing – Medium, 5-pack	1 x 3M™ V.A.C. Veraflo Cleanse Choice™ Foam (3-layer dressing) 18 x 12.5cm x varying thicknesses (0.8–1.6cm), 4 sheets of 3M™ V.A.C.® Advanced Drape, 4 packets of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Pad, 1 x disposable ruler/foam quantity label
ULTVCC05LG	3M™ V.A.C. Veraflo Cleanse Choice™ Dressing – Large, 5-pack	1 x 3M™ V.A.C. Veraflo Cleanse Choice™ Foam (3-layer dressing) 25.6 x 15.0cm x varying thicknesses (0.8–1.6cm), 6 sheets of 3M™ V.A.C.® Advanced Drape, 5 packets of 3M™ Cavilon™ No Sting Barrier Film, 1 x 3M™ V.A.C. VeraT.R.A.C. Duo™ Pad, 1 x disposable ruler/foam quantity label
ULTLNK0500	3M™ V.A.C. Veralink™ Cassette, 5-pack	The 3M™ V.A.C. Veralink Cassette is an instillation cassette that connects the solution bag/bottle and dressing tubing to the 3M™ V.A.C.® Ulta or the 3M™ V.A.C.® Ulta 4 Therapy Unit. The cassette holds and delivers user-provided wound solutions to the wound bed. 1 cassette with instillation tubing
ULTDUO0500	3M™ V.A.C. VeraT.R.A.C. Duo™ Tube Set, 5-pack	Contains two pads: the Instill pad for fluid instillation and the 3M™ SensaT.R.A.C. Pad for exudate/fluid removal and pressure sensing at the wound site. It also works with 3M™ SensaT.R.A.C. Technology to monitor and adjust pressure at the wound site. 1 dual-pad tube set, specifically designed for use with 3M™ Veraflo Therapy

3M™ Snap™ Therapy Unit

The 3M™ Snap™ Therapy Unit is a small, lightweight, disposable negative pressure wound therapy (NPWT) unit.

The 3M™ Snap™ Therapy Unit is for ambulatory patients who would benefit from the application of negative pressure, particularly those with small, difficult-to-dress wounds.

- ▶ Unlike other disposable NPWT systems, the 3M™ Snap™ Therapy System employs a familiar NPWT mechanism of action with a separate canister (with 60ml or 150ml capacity), reticulated open cell foam and -125mmHg pressure¹³
- ▶ In a multicenter RCT with 115 patients on lower extremity diabetic and venous wounds, patients treated with the Snap Therapy System demonstrated non-inferiority to the 3M™ V.A.C.® Therapy subjects in terms of wound size reduction at 4, 8, 12 and 16 weeks^{14, 15}
- ▶ 3M™ Snap Therapy System may help preserve patients quality of life and allows for mobility¹⁴
- ▶ Flexible and customisable dressings (including bridge!) with open-cell foam and cut-to-length tubing designed to address even the most difficult anatomy with pressure options (-75, -100 or -125mmHg) for any clinical scenario – all of which may be applied in less than 10 min¹⁴

How do you order 3M™ Snap Therapy Unit?

For the initial application, you need to order:

If required, you may also need these accessories:

3M™ Snap™ Therapy Cartridge and 3M™ Snap Plus™ Therapy Cartridge

Prevena™
Incision Therapy

3M™ Prevena™ Therapy

3M™ Prevena™ Therapy is uniquely designed to help manage and protect closed incisions in patients at risk from post-operative complications, including infection. By applying -125mmHg continuous negative pressure for up to 7 days, Prevena Therapy helps to:

- ▶ Hold incision edges together
- ▶ Remove fluid and infection materials away from the incision and into a replaceable canister
- ▶ Stabilise the incisions and reduce oedema
- ▶ Act as a barrier to external contamination

The lightweight and portable therapy unit can be easily managed by a patient in a home setting, and with no dressing changes required for up to 7 days, you can discharge with confidence.

Why use 3M™ Prevena™ Incision Therapy?

Clinically effective

Prevena Therapy has over 200 peer reviewed publications; demonstrating the effectiveness on closed incisions compared to standard of care.

Patient friendly

The lightweight and portable unit, can be used in the home setting for up to 7 days, without having to change dressings, helping to free up vital hospital resources.

Uniquely designed

Prevena Therapy includes a canister, to remove fluid and infectious materials from the incision site. It also contains 0.019% ionic silver in the skin interface layer to reduce bacterial colonization in the dressing. While the open reticulated foam bolster delivers -125mmHg negative pressure to reduce tension and hold incision edges together.

Easy to use

With 3M™ Prevena™ Peel and Place Dressings, simply peel, place and press. To begin therapy, the unit is a single-button operation.

Prevena™
Incision Therapy

3M™ Prevena™ Plus Customizable Incision Management System

The 3M™ Prevena Plus Customisable Incision Management System delivers all the advantages of 3M™ Prevena™ Therapy, with the added benefit of being suitable for use on linear, non-linear and intersecting surgical incisions up to 90cm in length.

3M™ Prevena™ Plus Customizable Dressing helps manage incisions in difficult anatomical areas by allowing clinicians to cut dressing to fit incision size/geometry.

The portable system can be easily managed by the patient at home for up to 7 days, with no dressing changes required.

Prevena Restor™

Postoperative Recovery

3M™ Prevena Restor™ Therapy

3M™ Prevena Restor™ Therapy is the first and only system designed to manage both the incision and surrounding soft tissue envelope. With up to 14 days of therapy and no dressing changes required, the device can enable clinicians to discharge with confidence during the critical post-op window.

Based on the proven original 3M™ Prevena™ Therapy technology, Prevena Restor Therapy can be applied to a variety of anatomical locations and is ideal for surgical procedures including (but not limited to):

- ▶ Breast surgery
- ▶ Plastic surgery
- ▶ Orthopaedic and trauma surgery
- ▶ General surgery
- ▶ Vascular surgery

Why use 3M™ Prevena Restor™ Therapy?

Expanded Coverage Area

Larger dressing delivers -125mmHg of negative pressure therapy to both the incision and surrounding soft tissue envelope.

Extended Therapy Time

With up to 14 days of negative pressure therapy, Prevena Restor Therapy reduces the need for frequent dressing changes, enabling you to discharge with confidence.

Precision Designed

Dressing seamlessly conforms to the patient and allows for articulation.

Easy to Apply

Simply peel and place the form-fitting dressing.

3M™ Prevena Restor™ Bella●Form™ Incision Management System

3M™ AbThera™ Open Abdomen Negative Pressure Therapy

3M™ AbThera™ SensaT.R.A.C.™ Open Abdomen Dressing, when used with a compatible 3M™ V.A.C.® Therapy Unit, forms a temporary abdominal closure system that helps surgeons take control early when managing a challenging open abdomen and helps achieve primary fascial closure.¹

Why use 3M™ AbThera™ Therapy?

- ▶ Actively removes fluid and helps reduce edema^{1,2}
- ▶ Provides medial tension, which helps minimise fascial retraction and loss of domain³
- ▶ Helps protect abdominal contents from external environment
- ▶ Provides separation between the abdominal wall and viscera, protecting abdominal contents
- ▶ Allows for rapid access for re-entry and does not require sutures for placement

Product code	Product description	Every sterile pouch contains
M8275026/5	3M™ AbThera™ SensaT.R.A.C. Open Abdomen Dressing, 5-pack	3M™ AbThera™ Fenestrated Visceral Protective Layer, AbThera Perforated Foam, V.A.C.® Drapes, SensaT.R.A.C. Pad and Tubing

3M™ AbThera™ Advance Open Abdomen Negative Pressure Therapy

Under negative pressure, the unique configuration of the 3M™ AbThera™ Advance Perforated Foam is designed to collapse medially, while maintaining its vertical rigidity.⁴

It actively facilitates drawing wound edges together.⁴

Pre-clinical evidence

A comparative study has been conducted with 4 healthy pigs with an open abdominal wound. Wounds were either treated with 3M™ AbThera™ SensaT.R.A.C.™ Open Abdomen Dressing or with 3M™ AbThera™ Advance Open Abdomen Dressing at -125MMHg for 5 minutes. Results showed that the 3M™ AbThera™ Advance Dressing showed the following differences:

31% increase in overall tissue movement⁴ (N=82, p<0.005)

39% increase in skin movement⁴ (N=42, p<0.05)

20% increase in fascia movement⁴ (N=40, p<0.05)

No change in intra-abdominal pressure was observed in this study when negative pressure was applied⁴

Product code	Product description	Every sterile pouch contains
ABT1055	3M™ AbThera™ Advance Open Abdomen Dressing, 5-pack For use with negative pressure therapy provided by 3M™ V.A.C.® Ultra Therapy Unit or 3M™ V.A.C.® Ultra 4 Therapy System	3M™ AbThera™ Fenestrated Visceral Protective Layer, 2 x 3M™ AbThera™ Advance Perforated Foam, 4 x 3M™ V.A.C.® Drapes, 3M™ AbThera™ SensaT.R.A.C.™ Open Abdomen Dressing

Cavilon™
Skin Care Solutions

3M™ Cavilon™ No Sting Barrier Film

3M™ Cavilon™ No Sting Barrier Film is a durable terpolymer-based alcohol-free barrier film, which forms a breathable, transparent protective coating on the skin to protect from friction, adhesive trauma and bodily fluids (such as urine and/or faeces and wound exudate).

Why use 3M™ Cavilon™ No Sting Barrier Film?

- ▶ Does not sting, even on broken or irritated skin⁵
- ▶ Does not clog the linings of protective incontinence pads⁶
- ▶ Cost effective – provides up to 72 hours protection⁷
- ▶ Transparent – for easy monitoring of skin
- ▶ Compatible with skin prep solutions (i.e. chlorhexidine gluconate and povidone iodone)⁸
- ▶ Allows adhesion of tapes, dressings and devices⁸
- ▶ Allows moisture vapor transmission from the skin
- ▶ No need to remove between applications

For further information on 3M™ Cavilon™ Skin Care Solutions, please contact your local 3M representative or contact us at 3M.com

Cavilon™
Skin Care Solutions

Indications of 3M™ Cavilon™ No Sting Barrier Film

3M™ Cavilon™ No Sting Barrier Film is a liquid intended for use as a film-forming product, that upon application to intact or damaged skin forms a long lasting waterproof barrier, which acts as a protective interface between the skin and bodily wastes, fluids, adhesive products, and friction. It is intended as a primary barrier against irritation from body fluids.

- ▶ Periwound skin protection
- ▶ Peristomal skin protection
- ▶ Peritube skin protection
- ▶ Adhesive skin protection
- ▶ Incontinence skin protection

The product may be used on adults, children, and infants over one month of age.

Contraindications of 3M™ Cavilon™ No Sting Barrier Film

3M™ Cavilon™ No Sting Barrier Film is **not** to be used:

- ▶ As the only covering in situations that require dressing protection from bacterial contamination/penetration, e.g. intravenous therapy catheter sites and full or partial thickness wounds
- ▶ On infected areas of the skin

**For further information on 3M™ Cavilon™ Skin Care Solutions,

Cavilon™
Skin Care Solutions

3M™ Cavilon™ Advanced Skin Protectant

3M™ Cavilon™ Advanced Skin Protectant is a highly durable, ultra-thin, transparent barrier which protects against the harmful effects of bodily fluids. This barrier adheres to wet denuded skin and creates a protective environment that supports healing and reduces pain associated with skin breakdown due to urine and/or faeces.⁵ It can be used to cover partial thickness lesions.

Why use 3M™ Cavilon™ Advanced Skin Protectant?

- ▶ Application only needed twice per week⁵
- ▶ Attaches to wet, weepy, damaged skin⁵
- ▶ Single-use applicator reduces the potential for cross-contamination
- ▶ Reduces the pain of managing IAD⁵
- ▶ Breathable, allowing for moisture-vapour transmission that helps keep skin comfortable
- ▶ Creates an environment that supports healing⁶
