

3M™ M*Modal CDI Collaborate™

- Generates worklist priorities that drive CDI team consistency and efficiency
- Streamlines the query and review workflows

The 3M advantage

Integrated workflows for document creation and improvement close the loop between clinical care and revenue integrity.

Users can launch the 3M™ Codefinder™ from 3M CDI Collaborate, passing in existing codes and patient demographic information. The resulting codes and DRG information are passed back to 3M CDI Collaborate upon completion.

Connected workflows drive quality and revenue integrity

A complete, accurate clinical story is a strategic necessity—essential to supporting patient care, quality outcomes, compliance risk management and revenue integrity. But it's not sustainable for clinical documentation integrity (CDI) teams to manually read every document in a patient's chart to confirm every diagnosis and treatment. In fact, this manual searching is the primary reason many CDI departments cannot review all encounters and review specific episodes only.

3M CDI Collaborate is a cloud-based CDI solution used to enhance chart review and query workflow. This technology driven, workflow management solution streamlines clinical documentation workflow by giving users a single access point to all encounter information. CDI Collaborate has the capability to sort and subsequently focus on priority encounters, generate query templates and track communication/activity within each encounter.

CDI worklist prioritisation and workflow management

3M CDI Collaborate helps to prioritise chart review and query workflow by providing auto-generated worklist. It eliminates much of the manual decision making for which cases should be reviewed for clinical documentation integrity.

Continually updated CDI worklists, templates and other tools streamline the query process with clinicians and provide a robust interface to manage and correct documentation discrepancies. CDI managers can also use reporting tools and a sophisticated search functionality to quickly identify priorities and spot trends to improve performance.

Our combined strength

250+ million
clinical documents
pass through 3M's
systems every month

250,000+ clinicians
use 3M speech technology

4,000+ hospitals
rely on AI-powered
solutions from 3M

2,000+ facilities
send data through 3M's
Clinical Discovery Engine
every day

200+ EHRs
certified for 3M
conversational
AI and CAPD.
