

3M™ CMP Pad Conditioners

Redefining CMP.

As semiconductor manufacturing yield requirements increase, so do the demands on your chemical mechanical planarization (CMP) process and CMP pads to deliver consistent planarization every time.

3M's pad conditioners are engineered to help you meet some of your most demanding needs, including:

- ▶ Extended pad life
- ▶ Reduced pad wear
- ▶ New low metallic pad conditioners for advanced processes
- ▶ Pad conditioner solutions for nearly every process and need

20 years of innovation and collaboration

3M has provided cutting-edge CMP pad conditioning technology to many leading companies in the semiconductor industry for over 20 years.

Ongoing innovation

From the exclusive sintered abrasive technology behind consistent, reliable 3M™ Diamond Pad Conditioners to today's microreplicated 3M™ Trizact™ Pad Conditioners for demanding advanced node processes, we work to help you enable your innovations and optimize your CMP process.

Global product support

Our three independent lab and manufacturing locations around the world help provide support and service near your business.

3M™ Trizact™ Pad Conditioners

Using precisely engineered, microreplicated, diamond-coated ceramic structures, 3M™ Trizact™ Pad Conditioners provide excellent, highly consistent disk-to-disk performance for the most demanding advanced node processes.

The metal-free cutting surface avoids the risk of metallic contamination for sensitive processes.

3M™ Diamond Pad Conditioners

3M™ Diamond Pad Conditioners use 3M's exclusive sintered abrasive technology to provide a powerful chemical and mechanical bond between diamonds and substrate, helping keep diamonds intact and in place for consistent long-term conditioning performance.

3M™ CMP Pad Conditioner Brushes

Featuring a metal-free construction and low cost of ownership, 3M™ CMP Pad Conditioner Brushes are engineered for CMP buff and pad cleaning applications. The durable bristles help remove debris and generate texture on porometric and felt-based pads.

Technical Information: The technical information, recommendations and other statements contained in this document are based upon tests or experience that 3M believes are reliable, but the accuracy or completeness of such information is not guaranteed.

Product Use: Many factors beyond 3M's control and uniquely within user's knowledge and control can affect the use and performance of a 3M product in a particular application. Given the variety of factors that can affect the use and performance of a 3M product, user is solely responsible for evaluating the 3M product and determining whether it is fit for a particular purpose and suitable for user's method of application. Further, user is solely responsible for following all applicable environmental laws and regulations when using the product.

Warranty, Limited Remedy, and Disclaimer: Unless an additional warranty is specifically stated on the applicable 3M product packaging or product literature, 3M warrants that each 3M product meets the applicable 3M product specification at the time 3M ships the product. 3M MAKES NO OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY IMPLIED WARRANTY OR CONDITION ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE. If the 3M product does not conform to this warranty, then the sole and exclusive remedy is, at 3M's option, replacement of the 3M product or refund of the purchase price.

Limitation of Liability: Except where prohibited by law, 3M will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
