3M™ Instant Microbe Removing Wipes

**Get a clean
you've never seen.**

Disinfectants kill germs but don't remove them. Instead, trap, hold and remove germs to get surfaces clean and virtually eliminate cross-contamination.

No, it's not magic — it's 3M science at work.

Don't let germs stick around.

Get a clean facility with no extra effort. While disinfectant wipes kill germs, they leave dead microbes on surfaces creating a breeding ground for still more germs.

3M™ Instant Microbe Removing Wipes quickly trap, hold and remove microbes from hard, nonporous surfaces using only water.

- **Remove germs as you wipe.**

Quickly remove 99.9% of microbes from hard, nonporous surfaces as you wipe — including viruses such as SARS-CoV-2 (COVID-19), bacteria and spores.

- **Just add water.**

Unlike wipes that use disinfectants, 3M™ Instant Microbe Removing Wipes require only water. No chemical smell or surface degradation — and no chemicals means no PPE required.

- **Clean faster.**

Use on high-touch, fast-turnaround surfaces that need instant microbe removal or where chemicals are not safe or practical to use. No mixing, dwell time or laundering towels to slow you down.

Choose a better wipe.

Put 3M science to work and wipe away germs.

Ordering information

3M™ Instant Microbe Removing Wipes			
Description	SKU	Wipe size	Unit
3M™ Instant Microbe Removing Wipes, 4 Canisters/Case	7100247203	255 mm x 195 mm (10.04in x 7.68in)	85 wipes/canister
