

# Griddle Cleaning System

## Griddle Scouring Screen Ref 200

Technical Data Sheet TDS 254

Date: July 2021

### Description:

The 3M Scotch-Brite™ Griddle screen 200 is an open mesh resistant screen with tough abrasive particles. It is used to remove food debris from griddle at temperature below 100°C. It's commonly used in combination with 3M N°461 holder and 3M N° 46 Polishing Pad.

### Product Advantages:

Removes carbonized grease and food debris from the griddle in an efficient way: fast cleaning action, avoids clogging and is easy to clean.

### Where and When to Use:

Cleaning of ovens and griddles that have cooled down, generally end-of-day cleaning.

### Directions for Use:

Commonly used in combination with 3M N°461 holder and 3M N° 46 Polishing Pad.

#### Procedure:

- 1- Place #200 screen on griddle, #46 pad on top, and the holder on top of #46: #200 screen is in contact with the surface to clean.
- 2- Apply pressure and run push pull movements.  
Note: using 46 between screen and holder will maximize screen life and minimize loading.  
Note: #200 screen can be used on both sides.
- 3- Polishing: use pad #46 alone under 461 holders, after the scouring operation above. (temperature below 100°C)

### Maintenance:

Clean the screens and pads to optimize their life's.

### Product Characteristics:

- 200 Screen:
  - Polyester screen fiber
  - Dedicated mineral and resin

Dimensions	#200 screen
