

# Polyurethane Tape 8663

## For Protection Against Fluid Penetration On Aircraft Flooring

## Tough Durable Corrosion Barrier

3M™ Polyurethane Tape 8663 provides a unique combination of toughness, durability, puncture resistance, and ease of application in helping prevent fluid penetration which could result in aircraft corrosion.

Application of 8663 tape over aircraft floor panels establishes a tough durable puncture resistant barrier that helps prevent liquids (water, soda pop, coffee, milk, urine, etc.) from penetrating flooring and becoming a possible source of corrosion.

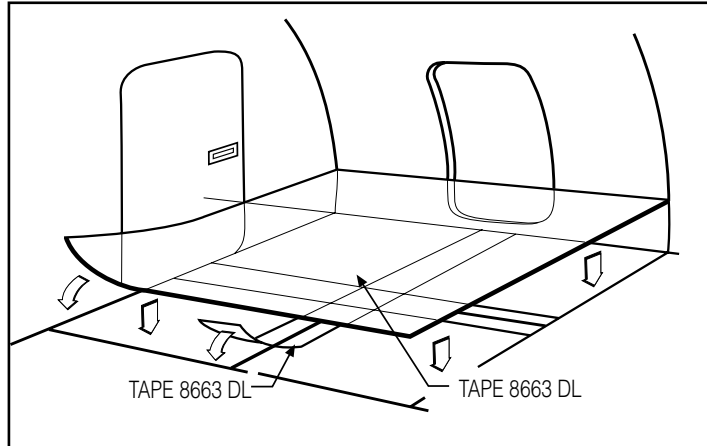

8663 tape is used as protection against fluid penetration on Boeing 737 and 757 aircraft entry areas, galleys, and lavatories to help reduce possible corrosion damage caused by liquids spilled in these areas.

8663 tape is provided in roll-stock form and is available in widths up to 48".

# 3M™ Polyurethane Tape 8663

**Pressure sensitive adhesive makes application of 8663 tape fast and easy.**

**Transparent color allows visual inspection through material without removal.**

3M Polyurethane Protective Tape 8663 is part of a family of high performance products from 3M for various aerospace applications. 3M Polyurethane Protective Tape products are available worldwide.
