

**3M** Science.  
Applied to Life.™

# High gloss. Less effort.

Reduce the labor and product cost associated with your routine floor maintenance.

---

**3M™ Advanced Floor Care System**

# Change your products, not your process.

Get a first-class shine without all the burnishing, scrubbing, stripping and recoating — or the harsh chemicals. The 3M™ Advanced Floor Care System helps you get the results you want with the tasks you do every day.

- **Beautiful appearance.** High gloss with less labour and fewer chemicals.
- **Cost savings.** Fewer needed procedures; and less equipment and product use means lower total cost of ownership.
- **Less labour and disruption.** Reduced need for the recurring maintenance tasks that are most disruptive to your facility and your guests.
- **Protect your investment.** As use of hand sanitisers becomes more widespread, protect your floors with a coating that can resist the surface damage they can cause.

For best results, use all the elements of the 3M Advanced Floor Care System as part of your routine floor maintenance. Using the whole system can significantly reduce or eliminate the need for burnishing.

# Two tasks. One product.

## 3M™ Clean & Shine Daily Floor Enhancer

Choose a daily cleaner that does double duty. As facility-management priorities shift, so will the attention to allocation of labour and product cost. 3M Clean & Shine Daily Floor Enhancer is a two-in-one product that may help to reduce your labour and chemical usage while meeting the standards you need for daily floor cleaning — and improving your floors' qualities over time.

- Enhances the gloss of floors — and maintains those that already have a high gloss — as part of your daily cleaning routine, reducing the need for burnishing.
- Reduces the frequency of major floor care projects, like top scrubbing and stripping, that disrupt your facility.
- Has superior cleaning ability when compared to other neutral cleaners and restorers.
- Won't haze or damage floor finish when used daily as directed.
- Ideal for health care facilities; schools; and large, high-traffic buildings like stadiums, airports and event centers.

# Clean and shine floors in one step.

## Scotch-Brite™ Clean & Shine Pads

Get a stunning reflection with less time, effort and equipment. Scotch-Brite Clean & Shine Pads gradually increase shine with each use to simplify floor maintenance. When used for daily cleaning, they improve gloss and reflection over time — reducing the need for burnishing.

- Effective on floors with either a high or low starting shine.
- Work with just water or neutral cleaner.
- Remove black marks 3X faster than traditional cleaning pads.
- Last longer than traditional cleaning pads for lower overall cost and reduced waste.
- Can be used on most coated and uncoated floors, including VCT, vinyl, stone, terrazzo, concrete, marble, linoleum, granite and rubber.

*Certified by Green Seal® for Environmental Innovation based on a design for significantly improved initial performance compared to competitive products, extending the useful life of the floor pad and reducing solid waste generation.*

# Improve on acrylics.

## Scotchgard™ UHS25 Floor Finish

Get the high-gloss floor you desire with less labor and long-term expense than other floor finishes. Unlike typical acrylic finishes, this floor finish has a special 25% solids formula for maximum shine and durability.

When used as part of the Advanced Floor Care System compared to the leading acrylic floor finishes, Scotchgard UHS25 Floor Finish:

- Reduces maintenance — extend out your strip and seal cycles
- Easy application - low mop drag
- Reduce or eliminate burninishing, while giving you similar shine and superior gloss retention.

Great choice for resilient tile and terrazzo floors and easy to repair.

# A system that fits your routine.

The 3M™ Advanced Floor Care System helps you achieve a beautiful, high-gloss floor while reducing maintenance costs. **For best results, incorporate all three products into your routine maintenance.**
