## Victory Series™ Low Profile Brackets

**The future is flash-free.**

Now even more efficient with available APC™ Flash-Free Adhesive technology.

# Victory Series™ Low Profile Brackets

**A comfortable and proven treatment choice you and your patients will appreciate.**

A beautiful smile is the ultimate goal – but a positive patient experience is an important part of treatment success. Victory Series™ Low Profile Brackets combine a treatment-proven design with a low profile and smooth curved features to make them an excellent choice for you and your patients.

## **The future is flash-free.**

Victory Series Low Profile Brackets also offer the unequaled efficiency of revolutionary APC™ Flash-Free Adhesive. That means less chair time, less than 2% bracket bond failure rate, and a better overall bonding experience for your patient.

## **APC™ Flash-Free**

Adhesive Coated Appliance System

- Eliminates the flash removal step at bonding
- Significantly reduces bonding time

Victory Series Low Profile Brackets are also available with APC™ PLUS and APC™ II Adhesive coating.

## **Low Profile Bracket Comparison**

Traditional Miniature  
Bracket

Bracket (Side Profile)

Victory Series™ Low Profile  
Bracket (Side Profile)

**Efficient and effective treatment for any case requirement you encounter.**

### **Victory Series™ Low Profile Brackets**

- True low profile metal bracket
- Uncompromising in ligation and control compared to full-size brackets
- Reduced occlusal interference
- Contoured micro-etched base
- Ample under tie-wing area for easy ligation and double ligation

*Smooth radius surface  
for enhanced patient comfort.*

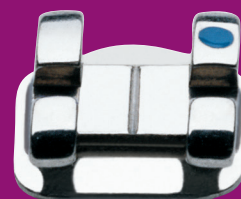

*Color-coded quadrant  
ID system.*

*Torque in  
base for  
level slot  
line-up.*

*Vertical  
scribe line  
for more  
accurate  
bracket  
placement.*

*Uncompromising under tie-  
wing area for ease of ligation.*

*Micro-etch base surface  
and anatomical contouring.*

**Victory Series™  
Low Profile Bracket**

The mesial-distal dimension is not compromised even though the bracket has a low profile. You maintain the rotational control you need to get the results you desire. Your patients will appreciate the comfort.

A unique rhomboid design with a flatter, compounded radius accommodates naturally occurring variation in tooth surfaces. This design assures three-point contact for increased tooth adaptation. Positioning is made easier and more accurate because their shape follows the natural vertical line of the tooth.

**MBT™**  
Versatile+ Appliance System

Victory Series Low Profile Brackets give you the power and versatility to handle the variability found in each new case and achieve consistent patient outcomes.

**You've chosen Victory Series™ Low Profile Brackets. Now round out your system with these three appliances designed for optimal efficiency and patient comfort.**

**Victory Series™**  
**Superior Fit** Buccal Tubes

**Victory Series™ Superior Fit Buccal Tubes** offer excellent handling characteristics, optimized tube-to-tooth fit and a strong reliable bond. Combine with APC™ Flash-Free Adhesive for a complete system designed for optimal efficiency, control and versatility.

**AlastiK™**  
**Easy-To-Tie**  
Ligatures

**AlastiK™ Easy-to-Tie Ligatures** are angled to make ligature placement easier for you and your patients. Choose a wide variety of colors to match patient preference.

**FORSUS™**  
Fatigue Resistant Device

**Forsus™ Class II Correctors** are an “off-the-shelf” aesthetic treatment solution that can be added at any time during treatment, providing efficient and proven treatment. Forsus Correctors can be used with or without molar bands, making them a versatile and convenient choice.
