

CAREER CAPERS

Jacqui

Supply Chain Manager

I manage all the stages involved in the production and distribution of our company's products, from ensuring we have sufficient raw materials, through to delivering goods on time to meet customer demand.

This involves planning, leading a team, and communicating with suppliers and customers.

Qualification Needed

Diploma or Bachelor's Degree in Business / Logistics

Which of these orders would you prioritise – a customer who orders a large quantity of goods at very short notice or a customer with a smaller, regular order who will run out of stock if you don't deliver on time?

"All goods and services are brought to life by a supply chain –from raw materials and component parts to finished products. Coordinating these different elements, including people, suppliers and customers around the world, is a rewarding challenge."
