Four Frequently Asked Questions

What does the 3M™ Filtek™ Matrix procedure require?

Treatment typically includes two appointments. At your first appointment the dentist will take a digital impression of your teeth. At the next appointment, your doctor will use the 3M™ Filtek™ Matrix and you will walk out with your new smile.

Will the procedure hurt?

In many cases, use of the 3M™ Filtek™ Matrix does not require anesthesia. Your dentist will determine clinical need based on your dental situation.

How long will the results last?

Composites are a durable and clinically proven restorative material. Your dentist can advise you on how to maximize the longevity – including proper hygiene habits.

How do I care for the restoration?

Your beautiful smile may be new, but the way you care for it is the same – regular brushing and flossing. The great thing about composite restorations is they can be repaired quickly and easily if damaged.

Ask your dentist about the 3M™ Filtek™ Matrix today.

Filtek™
 Matrix

This will make you smile.

Getting the smile you've always wanted is easier than ever.

Open up and say "aah" to an exciting new procedure that lets you have the smile of your dreams with a less invasive process, fewer office visits and that's less costly than other alternatives.

Ask your dentist about the 3M™ Filtek™ Matrix and find out if it's right for you.

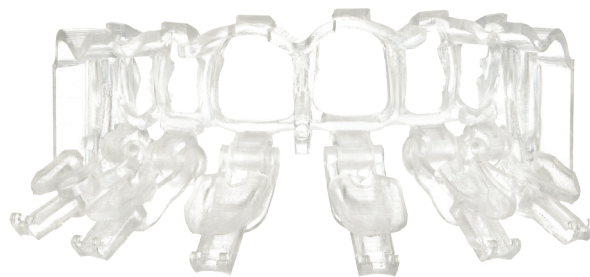

Real patients. Real results.

The 3M™ Filtek™ Matrix can be used to treat a variety of cases on upper and lower teeth.

How does the 3M™ Filtek™ Matrix work?

The 3M™ Filtek™ Matrix assists with esthetic restorative procedures like the ones pictured here, by bonding dental restorative material to the surface of the tooth. Your doctor will use a matrix that is digitally designed just for you to place restorative filling material and deliver the esthetic result you desire. It's time to give yourself the smile you've always wanted with a solution that requires fewer office visits, is less invasive and often more cost-effective than other procedures.

Discuss with your dentist how the
3M™ Filtek™ Matrix can change your
smile today!
