Preparing Your 8210 Respirator

1. Prepare to Use Respirator

- Wash your hands thoroughly with soap and water, or use hand sanitizer, before handling.
- Inspect respirator for holes, tears or other damage to surface, straps, metal nose strip and nose foam. Get a new respirator if damaged.
- With model 8210, pre-stretch the straps before wearing.

2. Follow the rest of the steps in the Wear It Right Poster to don your respirator
