

Case Study: 3M™ Clarity™ Aligners

Correction of moderate overbite, class II end on occlusion on left side, and space closure for lower left 1 extraction

Age: 37

Chief concern: Lower incisor needs to be extracted due to resorption and would like the space closed

Case diagnostics: Moderate overbite and moderate mandibular crowding with end on class II occlusion on left and class I occlusion on right. Internal resorption on lower left 1 requiring extraction

Total number of aligners: 61
(39 initial Tx Design, 21 in refinement)

Wear interval: Weekly

Treatment time: 14 months
