

Heavy Duty Griddle Cleaning System

- Griddle Pad Holder Ref 482

- Heavy Duty Griddle Cleaning Pad Ref 82

Technical Data Sheet TDS 217

Date: July 2021

Description:

The tool is a griddle cleaning system composed of a specific holder and a very tough heat resistant heavy-duty pad. It is recommended for use at operating temperatures.

- Holder 482: brown plastic handle with metallic plate having an attachment device.
- Heavy Duty Cleaning Pad 82: thin brown pad made of very coarse temperature resistant fibers.

Product Advantages:

- Holder 482:
 - Protect hands from residues (grease...) and high temperature.
 - Enables to apply higher pressure on the surface: better cleaning.
 - Securely maintains pad 82.
- Heavy Duty Griddle Cleaning Pad 82:
 - Easy cleaning: strong abrasive particles and open structure (reduces clogging).
 - Resist high operating temperatures.

Where and When to Use:

It's ideal for intermediate cleaning operations of griddles, at operating temperatures. It removes very efficiently burnt food debris.

Directions for Use:

- Insert the 82 pads to the metallic plate.
- Apply pressure and run push-pull motion on hot griddle.

Maintenance:

- Rinse out the pad with hot water after each use.
- Deep embedded soil can be removed by brushing with a nylon brush.

Product Characteristics:

82 Pad composition: glass fibers, specific mineral, polymer resin.

Features:

Features	#482	#82
L x l (mm)	141 x 102	139 x 114
Thickness	75 mm	3 mm
Weight (g/unit)	230	15
Schiefer value (typical value)		3
