

Advancing beyond plate and frame or lenticular filters to the future of wine clarification.

3M™ High Flow Systems

Designed for high efficiency, high filter surface area, and highly versatile applications. In the wine market, 3M High Flow filter cartridges can be used for pre-filtration on the bottling line, crossflow filtration, and in front of 3M™ Liqui-Cel™ membrane contractors for manufacture of sparkling wine.

- Cost-effective – Extends the life of final bottling filters
- Innovative – Replaces older technologies like plate + frame and lenticular filters
- Easy to use – Ergonomically designed for faster and easier insertion and removal

Contact your local 3M representative to help set up an onsite trial.
